In most cases any audio recorded with a video utilizes the microphone built into the camera or another microphone under the control of the camera operator or his associates. The sound is already available to eavesdropping by the unaided human ear. Like a phone tap, a scanner uses a microphone owned or controlled by the organization/person operating the wireless transmitter. In most circumstances other people wouldn't be able to overhear the speech of dispatchers or mobile emergency personnel without the aid of agency owned electronic equipment.

The issue will gradually become moot anyway as agencies transition to the use of cell phones, in car computer terminals and other encrypted radios

Caution MUST be used wording laws/regulations concerning monitoring and recording people indoors. People and invited guests/customers deserve privacy in areas where they can be expected to bathe, change clothes or use toilets/urinals. Privacy regulations shouldn't protect persons in the act of abusing people or pets in their care or in the process of committing burglary or other access not authorized by those legally occupying the premises (including landlords who don't provide adequate prior notice).

Rather unfinished, wouldn't you say? The label "Form1" is clearly visible
on the form, and "Tab6" and "Tab7" are clearly visible on the tabs. And
what makes your software "shortwave" anyway?

I have a Realistic PRO-2003 AM/FM scanning receiver for sale.  It is in very
good shape and comes with the manual.  I'm asking $45 plus postage for it.
You may contact me off the newsgroup.

Thanks

Henry

I have found a modification to speed up the scan rate on the pro 2021 however it is a bit confusing.It says to cut the leads on resistor R147 and solder in a 15k ohm resistor. Then at the bottom it says you are not replacing the R147 resistor a 39k ohm resistor i think. You are adding 15k ohms to the existing resistor,so my question is are you cutting the leads to one side of the resistor and adding the 15k ohm resistor in-line and if so exactly how would you do this. ex. color codes on resistor placed the same direction? Any other modifications other than opening up frequencies by cutting R44 and R45 I would like to know about them. One more thing anyone may be able to aswer.Why is it that in these seemingly catagorized groups there is sex stuff in everyone.Im somewhat new to groups and I just dont get it.Thank you in advance for your time.

A Facebook gateway is now available for the rec.radio.info Usenet newsgroup.

On your Facebook account, the gateway provides links on your Facebook news feed to rec.radio.info articles that are available on Google Groups. There are also links on this page to the other two radio-related newsgroups that have similar Facebook pages, ba.broadcast.moderated and rec.radio.broadcasting.

Search for the following Facebook page:

rec.radio.info (Usenet Newsgroup)

All you have to do is "Like" this page to receive updates on Facebook. You can also suggest the page to your friends through the usual Facebook methods.

It should be noted that what appears on the Facebook page is links to Google Groups. You will still have to go to Google Groups (or to your regular newsreader) to see the actual articles. This is a notification feed only. Due to occasional delays with article Message-ID index updates on Google Groups, the links to Google Groups may not be immediately available. Still, it might be a useful way to introduce the newsgroups to those not familiar to Usenet by using technology that might be more familiar to them (Facebook). Instead of doing the sometimes hard work of convincing folks to sign up for news access, or to check Google Groups, all you have to do is invite them to the Facebook page.

Please direct any comments, questions, or criticisms to rec-radio-info-request@panix.com, which is the default Followup-To address for this article.

and it was a public street I was parked on. the hoa roads are a different color pavement and where I was parked was here way before the hoas were ever built in this neighborhood. <<Or maybe that is because we are mandated to use ARES how can that be since the Kentucky state court has ruled ARES is illegal. also, anyone who obeyes their hoa to paint the tower so it blends in with the skyline and is invisible when looking at the skyline, including the cellphone companies doing so at the hoas insistence, will find a huge lawsuit on their hands when they are sued by a bunch of people whos relatives die in the crashes because the pilots did not know a tower was there since it blends n so well with the skyline instead of being visible. although the hoas are against it, the pilots want those towers visilthe pilots and federal government are for it. that is why lights are required on thosee the hoas are making airplane travelso le and NOT matching the skyline the pilots and federal government are for it. that is why lights are required on thosee the hoas are making airplane travelso ecause they are very very dangerous when painted a color where you cant see them. the hoas are making airplane travel much more dangerous for people. and when word gets out, I am sure the airplane companies wont lke losing all that revenue from people no longer flying.. http://www.avweb.com/blogs/insider/AMixedMessageOnMetTowers_204022-1.html

Idiot..... If the tower is tall enough to REQUIRE Lighting, (FAA AND FCC Regs) it ALSO is REQUIRED to be painted with the REQUIRED International Orange and White, alternating Paint Scheme.

If the tower is NOT of a height, to REQUIRE Lighting and Painting, then it is up to the owner to comply with any local Ordinances, and Private Contracts (HOA Covenants) that are in place on the land on which the tower is located.

Cell Towers, by in larger, are NOT of a height to REQUIRE Lighting, and Painting, because of their limited Cellular Coverage, similar to many Ham Radio Towers.

A pawn shop near me has one for sale.About $57.00.Somewhere around the middle of next month, the price goes down to about $47.00, according to the pawn shop sticker I saw on the scanner.It is a little hand held scanner, I didn't ask the sales clerk if I could look at it more closely, so I don't know exactly what model it is.Assuming it works OK, is it worth that much money?

palmdale restricted him to operating on vhf and uhf only and took away his fcc-license authority to operate on hf. one of palmdalesexcuses for this was for rf health reasons, the larger the antenna the more rf radiation there is which is harming the residents in palmdale, such as hf antennas, and the smaller the antenna , the less rf radiation there is which is healthier for the residents n palmdale., like vhf and uhf antennas, therefore he is restricted to vhf and uhf antennas and can still paarticipate in a part of ham radio.

d

well, accordng to the arrl, the fcc rf charts and rules show that transmitting at 100 watts or less on hf is perfectly safe for everyone and under the mpe limits,and transmitting at the same power level on vhf and uhf with a small antenna is harmfull. and more than the mpe limits.

so   by ruling the way they did, , palmdale has screwed theirselves over.

if he was transmitting at 75 watts on hf with a hf antenna on a radio capable of only a 75 watte setting, perfectly safe for his nimby neigh   bors.   they and the city of palmdale and the state ofcalifornia ruled that he is not allowed to transmit on hf and is only allowed to transmit on vhf and uhf despite what the fcc says. and s only allowed to have a vhf uhf antenna.   and if he is transmitting at 75 watts on vhf 2 meters ,   his nimby neigh bors are now getting more than the mpe limits of rf radiation.

why pay the arrl to upgrade your license   as the california state ruling in the palmdale case has recently proved, it is a complete waste of money to pay the arrl anything to upgrade your radio license since local cities and states can take it away anytime despite what the fcc says. you pay to upgrade to a general or extra then the local city and local state takes it away by busting you back down to techncian class even though younever violated any fcc rules and despite fcc rules saying no one except the fcc is allowed to force you to involuntary surrenderr your fcc license.

and if cities andd states can take away your general and extra class radio license despite what the fcc says as has happened in the palmdale case, then they can also take away your technician class license and even the right to operate your cb radio no matter what the fcc says.

why is this ruling of cities and states prohi biting you from having a general and extra class radio license despite the fcc granting you a license to operate general and extra class being allowed to stand.

whatever happened to the federal law trumps local city and state law the radio opeators were so fond of quoting in the past.

The tale the FCC explains is that Radioguy is transmitting from a very low
powered and extremely short rubber dickie.
His trolls are best left ignored.

Nobody need pay the ARRL to renew or upgrade a Ham license.
Stop your silly trolls.

Does your sister have to pay the Health Dept for her massage license?
Even tho she often does not use her hands?

You don't pay the FCC unless you get a call of your own choosing (vanity). You don't have to pay to renew your license on the ULS. You would have to pay W5YI to do it foe you. You have to pay the current test fee to the VEC unless you've got a VEC like the Laurel VEC that doesn't charge for tests.

The ARRL has nothing to do with license fees except to make recommendations.

If keep posting BS, I'll keep shooting holes in it.

These kinds of laws should be done at the state level and not the consumer
level. IOW, the state should inform the manufacturers of the cars that if
they want to market their products in the state, they must conform to the
following regulations: (statement of regulations)

To expect the individual buyers of automobiles to get them equiped to the
states regulations is a bit too much.....

If you drive at night and see an alien spaceship approaching, it is
most likely an Ecuadorian truck :) This is a bit disorientating and
gets rather annoying because you cannot really tell whether you are
looking at the front or the back of the vehicle!

Watts are important here. If you are talking 100 milliwatts or less, then you can transmit pretty near anywhere and at pretty near any frequency. These are the levels of garage door openers and cordless phones. They are only good for 100 yards or less. But most lawmakers can't tell a watt from a volt or an amp. They are technical minus people, or they would get a real job and actually contribute to the society instead of parasiting off of it.

Delaware didn't outlaw CB radio. It decided that CB radios fell under the hands-free cellphone law while driving.

Oregon outlaws using cellphone or any other electronic device while driving unlessit is hands free.

The law also says you are exempted if you hold an amateur radio license or any other vald FCC license and are using a ham radio.

So according to Oregon law, if you hold a FCC GMRS radio license and are using a GMRS radio, you are in violation of the law since you are not using a ham radio.

and iff you hold a FCC-issued GMRS license and are using a ham radio even though you are not FCC-licensed to do so, you are completely in compliance with the law and completely legal according to Oregonn law.

I thought that is a violation of federal law to transmit over a ham
radio when you are not FCC-licensed to do
so.
and what do all us federally legal cbers do.   the federally legal c
bers do not have a license to show to the cops or courts lthough they
are federally licensed to
transmit.
and why is this state law and other state laws overruling federal law
if federal law trumps and overrules local and state laws like most
posters in this newsgoup said they do.   The FCC rules say we
may transmit from anywhere the FCC has authority over
radio.
so either the FCC fraudently lied or else the FCC told the truth and
does not have authority over radio transmissions in Oregon and
California and Maryland.

If the law is taken literally, then yes, any state that bans "hand held devices", would include CB radios.
But I believe most cops would not enforce that aspect of the law.

But would that law include hand held units that are not attached to the vehicle? Some cops may see those as they see cell phones.

That's an argument that would have to be settled in a court of law.
True, the FCC authorizes the use of CB radio. But states, certainly can restrict their use in a vehicle. That does not deny the use of them by any means. You just can't yack while driving.

BTW lawmakers, take a good close look at some expensive ham radio equipment for mobile use. What's that? You don't see that dial pad on the radio?
Guess what dude? That hammy can make phone calls with his radio just the same as any cell phone.

Actually, they can. Police and fire emergency services have priority. If it is deemed that the ham operator is causing interference to the communications, then he can be charged.

Even though 420 - 450mhz is shared, an actual specific frequency might not be.

Just because that radio can transmit on any particular frequency out of the box, doesn't mean you have the legal right to do so.

Actually NO, the LEO can NOT enforce FCC Rules and Regulations, in the
senerio above, and should he/she try, they can be prosecuted for

exceeding their Authority. An FCC Agent can investigate such violations of said FCC Rules and Regulations, inspect Licensed Stations, and seal Radio Gear in the OFF, non-powered State, Request to inspect a non-licensed Station, but can NOT enter that location if the REQUEST is refused by the OWNER of the Land or Building. FCC Agents are NOT able to Confiscate, or Arrest ANYONE for such violations. If they need "muscle" to do the later, then on Land they go get the local US Marshal, and on water they go grab the local USCG Officer, who CAN, and Will make those things happen, when the FCC Agent has made the case. Lots of LEOs think that they can do these things, but when they get into a court of Law, they find their case thrown out due to the above stated lack of jurisdiction, and if the fellow so arrested, has a Good and Smart Mouthpiece, can actually get significant DAMAGES from the LEOs government. I have dealt with such cases, and invariably, the thing gets resolved by the local Prosecutor, long before they ever get in front of the Judge, because he, if he is smart, researches the Federal Statutes, and reams out the LEO, BIG TIME, and tries to quietly make the whole thing GO AWAY..... if he isn't all that smart, then he gets his ass handed to him in Court, by the defendants smarter Mouthpiece, and if the Judge goes along with the local guys, the whole case gets overturned on appeal, when they get to a REAL court of LAW with a Judge who follows the LAW.....

Actually, they are NOT the same frequencies.

Radios designed for 70cm amateur use are normally limited to transmitting between 420-450 Mhz, and for most FM radios, 440-450 Mhz (the FM segment). While they can be modified, they are not normally able to transmit out of the amateur band without modification.

420-450 Mhz is allocated to amateur radio on a secondary basis, and to radiolocation (ie: radar) on a primary basis.

In some areas of the country (north of "line A", ~50 miles south of the Canadian border), and (east of "line C", along the eastern edge of Alaska, ~50 miles west of the Canadian border), 420-430 Mhz has been removed from the amateur service, and may be reallocated to land mobile use, subject to coordination with Canada.

47 CFR 2.106 footnote US230 indicates that certain segments in the 420-430 Mhz band are allocated to land mobile service for non-federal uses within 50 miles of Detroit MI, Buffalo NY, and Cleveland OH, which are along, or very close to, the Canadian border.

So, if you are using a unmodified FM radio built for part 97 amateur use, it probably will not transmit on 420-430 Mhz by default, which is the only segment that is reallocated. Since the segment is reallocated, not shared, there is no shared use.

However, there is nothing in the FCC regulations that would prevent a amateur radio operator from using a radio built for part 90 land mobile service on the amateur bands, and such radios are capable of being programmed for frequencies shared with public safety. After all, they are the same general type of radios used by public safety agencies.

It is the responsibility of the licensee to adhere to the conditions of their license.

Very true.. The FCC takes a very dim view of local law enforcement attempting to enforce laws relating to telecommnications, over which the locals have no jurisdiction whatsoever.

Still, interfering (deliberately or not) with public service units such as
fire and police are criminal acts punishable usually by state law.

Do not the FCC rules and regs also state that when a public service unit
has been issued a license to operate on that shared frequency that said
unit has priority over amateur radio service?

If they need "muscle" to do the later, then on Land they go get the local US Marshal, and on water they go grab the local USCG Officer, who CAN, and Will make those things happen, when the FCC Agent has made the case. Lots of LEOs think that they can do these things, but when they get into a court of Law, they find their case thrown out due to the above stated lack of jurisdiction, and if the fellow so arrested, has a Good and Smart Mouthpiece, can actually get significant DAMAGES from the LEOs government. I have dealt with such cases, and invariably, the thing gets resolved by the local Prosecutor, long before they ever get in front of the Judge, because he, if he is smart, researches the Federal Statutes, and reams out the LEO, BIG TIME, and tries to quietly make the whole thing GO AWAY..... if he isn't all that smart, then he gets his ass handed to him in Court, by the defendants smarter Mouthpiece, and if the Judge goes along with the local guys, the whole case gets overturned on appeal, when they get to a REAL court of LAW with a Judge who follows the LAW.....

Scroll down aways and you'll find a paragraph that states, she was issued a license to operate on "Adjacent" frequencies, but not on actual police frequencies.

If she bought a radio that was capable of transmitting on known assigned police frequencies, then that radio should be banned as being illegal.
As it permits transmissions outside of the allotted frequencies.

Does having a radio that has voice and code capabilities give you the legal right to transmit voice on code only frequencies?
Your viewpoint says yes.

So you're going to continue stating your belief the amateur radio operator
is always the winner?
As you can see, the FCC can yank your license if they want to.

Oh so you finally found me here too huh?
Must be really really boring.

FYI, asswipe, the FCC has numerous rules and regs on what is considered to be an illegal radio. One of the most common infractions is a radio that is designed to transmit on 10 meters, but can also be easily modified to transmit on 11 meters, the CB band. Ergo, transmitting out of the legal range.

If you, as a properly licensed operator, operate on a frequency you are not entitled to, even as a ham, you can get your license yanked.

As you ARE a licensed ham, you should know this.
You are required to know it.

My FT-50 was 'modified' without opening the case.

The correct answer to the question is NO.

However the statement that there are no legally enforceable code only
frequencies may be technically correct if 'code' is used in the historical
sense to mean (International) Morse Code. The existing 'code' only
frequency bands (e.g. 3.500 to 3.600 MHz) also permit RTTY and other data
encoding protocols. They do not permit voice (AM, FM, SSB, etc.)

Its by FCC rule.  The regulations specify what emission type (and power)
is allowed on what frequencies.

This answer only applies to HF bands in the US.  There are CW only
frequencies in
the 6 and 2 meter bands.  Other countries have other rules.

and just how were the MURS users who were travellers on the free way supposed to know that they were "interfering with police frequencies" on 154.570 mhz when they heard absolutely nothing on the channel until after they tried to talk to their friends on 154.570 mhz and the police department transmitted back all p.o.'ed that some people they didn't know (private U.S. citizens) was transmitting on their puiblic safety "police channel" of 154.570 mhz??????

and those travellers were monitoring the whole time on their vacation (travels)

>

See above. You say they can be pubnished for interfering with the police on 154.570 mhz even though they did not deliberately interfere with them.

As I understand the rule, it is NOT interference if you're (they're) transmitting when you hear no one on teh channel after monitoring it, and not transmitting over the top of them when the police are talking.

But of course, if they could hear the police and transmitted, that would be deliberate interference which they would be guilty of, but didn't and even if they did, which they didn't, is a matter for the FCC to handle, not the local-yokel cops.

So the only way to interfere with them not deliveratelv is what happened, not knowing anyone else was on the channel ssince they were monitoring it for a very long time, transmitted when they needed to, the the police come back which you claim they are responsible for even though it wasn't delibarate interfering since it was interfering with the police. (Not the way I understand the FCC rules say).

And the police claiming it's illegal delibarate interference for them to transmit on the "police channel" (154. 570 mhz) 9even though it wasn't delibarate since the police didn't transmit unti AFTER they heard the private citizens transmit.)
The FCC rules plainly say that the NURS channels MUST be SHARED and will NOT be assigned exclusively to any one group, person, business, or organization.

And just which public service agency has the FCC ever licensed to use

154.570 MHZ as their main police frequency or their main public
service frequency????

Furthermore, just which police or public service agency has the FCC
ever licensed to use 154.570 mhz as their police freqiuency or public
service frequency???

Before itr was MURS, it was a business band frequency, NOT a police or
public-servuce frequency.

Hi,

Read that GRE has just come out with a new "quivalent" of Uniden's
Home Patrol scanner.

True ?

If so, what's the model number for it, please ?

Opinions on ?

Thanks,
B.

I don't know why the ban scanners from having the cell freqs in them,they are all scrambled anyway so what
are they worrying about,maybe there is a way to descramble the cell freqs and they are worried about it,all
it is ..is a rush on there as I have a vr-5000 and a old yaesu 9600 and they tell me what is going on,so
does anyone know why they ban or stop scanners from being made with 815 to 856 or whatever,its not apcop25
technology on the phones so what what is the system they use on cellphones anyone know?I would buy my 996's
etc from europe if i knew they would be wide open over there like my yaesu vr-5000 was.and heck they even
stated that vr-5000s cant have the cell bands in them,well the vr5000 cant decode cellfreqs anyway so whats
the problemo

The mode used is FM and it can be easily monitored by any FM receiver
that covers the range. It is not scrambled in any way.

The ban was applied because cell phone companies bought a law rather
than advising its customers they could be monitored.

The intent is to block reception of analog phones.
One day when the US catches up with the rest of the world and does
away with analog the law can be rescinded.

?That 156 MHz frequency is *not* an amateur frequency.
Understand that there are no sanity tests required to get a license.
The guy is lucky that is all he got for a penalty.

I have a Pro-92 Scanner that needs the audio module replaced. This scanner is brand new and had a power supply plugged into the speaker output. The unit is made in Japan serial # 015228..... I am looking to buy equivalent scanner for this part only. I do not have the power supply that was offered at the time I purchased the scanner either. Any further information or leads would be greatly appreciated. Thank You for this forum!!!!!

Yep
Good Ol Newt Gingrich
Had a call recorded and released
been a loooong time since that news broke, must have been the early mid 90s
just Google that name and scanner and cell phone

the story is all there

story ends with 'Ol Newt and another mate claiming that scanner owners

were "Electronic Stalkers" and pushed for a bill to ban their use or
have the freqs blocked, Cell phone companies added their support

Gotta love a country that claims to be "The Land Of The Free" but have

The climbers you know probably climb 100 ft towers?

With this tower that would require 3,400 ft of rope, which probably
weighs more than the tools and will be very difficult to handle.

The climbers you know probably climb 100 ft towers?

With this tower that would require 3,400 ft of rope, which probably
weighs more than the tools and will be very difficult to handle.

Not to mention the extreme likelihood of the rope getting blown around
and/or snagged on any of dozens of appendages (microwave antennas, FM and
comms antennas, tower lighting, etc) that are on such tall structures.

You take a messenger rope (3/32") up with you. Once through the pulley
and back down that rope is used to lift a more substantial rope, all
done by the winch on the service truck. This is a safety feature. People
cramp up sometimes.

You usually have a ground crew person feeding the line and watching such
things. California has stricter laws than OSHA. I think you have to clip
on when climbing here.

9mm static line weighs 57 gm/meter. A 1000 meter loop would weight
57kg or 126 lbs. No thanks. Also, the line has quite a bit of wind
resistance and will probably cause the 30 lb tool bag to sway quite a
bit in the wind. However, since he rode the elevator almost to the
top, he might be able to handle a 50 meter single static line to the
top of the elevator.

Nice video. I wonder what they were repairing on top of the tower?
Replacing the tower light?

Press Release

Tower Association Responds to Erroneous and Dangerous Video

The following statement is being issued by the National Association of
Tower Erectors (NATE) regarding a dangerous video post erroneously

characterizing �free climbing� on towers as lawful and common.

NATE would like to publicly denounce the message of the recently posted video depicting two men climbing a broadcast tower. NATE asserts that the posting of the content was misguided and its messages should not be given credence by any viewer.

The �Stairway to Heaven� video, reportedly launched by TheOnLineEngineer.org, suggests that free climbing is an accepted method of ascending and descending broadcast and telecommunication towers. The video incorrectly asserts that free climbing is accepted by OSHA and that �most tower workers climb this way.� The video also depicts as standard procedure other dangerous and prohibited conduct not condoned by NATE or OSHA. There are many inaccuracies in this video.

NATE�s efforts to establish a culture of safety in the wireless and broadcast tower industry encourages everyone involved with tower work to adhere to recognized safe practices. The video in question is an example of a climber who is either unaware of recognized safety practices or is unwilling to take the time to protect his life and the life of his co-worker in the video. By extension it encourages others to employ unsafe climbing techniques not endorsed by either OSHA or NATE.

Contractors who refuse to operate safely should never be hired. This video is one more example of why the efforts of NATE, our membership and industry partners are imperative.

NATE, the industry�s leader in tower safety, continues to pursue working relationships with carriers, broadcasters and other tower owner/operators to ensure that only qualified contractors set foot on tower sites. The Association has worked with OSHA to develop safety best practices and educational programs to ensure every tower worker goes home safely every day. Companies which allow free climbing and other violations of recognized safety practices are placing lives in danger and jeopardizing tower work services.

NATE is looking forward to OSHA�s statement clarifying this matter for the industry.

Work Quality in Question

Employers who allow such practices will likely cut corners on other aspects of their work. NATE asks, �If a company or employee will cut corners with the lives of its workers, on what other aspects of work will they be willing to cut corners?� Owners and operators who hire this type of contractor are opening themselves up to legal and regulatory actions and are additionally running the risk of system malfunctions, adding unnecessary costs on top of endangering lives.

NATE Requests Contact From Tower Owners and Operators

NATE is requesting contact from carriers, broadcasters and other entities who own, operate or control wireless and broadcast towers as well as the industry groups who represent them. NATE is doggedly pursuing working relationships with these organizations to ensure that a culture of safety exists throughout the industry and that only qualified contractors set foot on tower sites. If your organization fits this description, please contact Patrick Howey at 888-882-5865 or patrick@natehome.com.

yeah, and you'll probably see it brought up every few months for quite
a while now when someone new finds it for the first time.

Best thing to do is unsolder and remove it, replacing it with a 220K instead.

What the mod does is provide more consistency to the circuit. The stock squelch
circuit on the 2004 never seemed to break squelch setting in the same location.

Hope this helps.

John. Thanks very much.I will go to Radio Shack and get one and see
what I can do to make it more tolerable. And forgive all the spelling

i have a car charger that recently causes my scanner to display 'iilegal
voltage'. so i took out the fuse and it is a F250v 2A. Before I go out and
buy a new fuse (not knowing that is in case the issue), is this fuse in
fact strong enough for this radio? I always heard 8000mah was minimum. any
ideas/comments?

Check the voltage output of the charger. It could be more than 6 volts. mah would not affect it.

Well, a fuse regulates current, not voltage, and it does so by breaking the circuit when too much current flows through it. The fact that you said the charger "recently" causes the radio to display the illegal voltage notification leads me to believe that previously, you have used this charger without any problem, so the question becomes, what has changed since then that has in turn changed the voltage the scanner is seeing?

So if your scanner is telling you there's something wrong with the voltage, you should first check the voltage being supplied by the charger - which can be done with a simple multimeter. The most common problems are a connector that's loose, or shorted, or the safety clip that holds the connector together is broken, but some component of the charger itself may have recently failed and now be defective - in which case you need a new charger, not a new fuse.

You might also want to check the voltage of the vehicle's electrical system, which can drop too low when you're running the heater/defroster on full blast, using the windshield wipers, etc. Various problems in a vehicle's electrical system which can cause voltage drops should be handled by your usual repair shop unless you're handy with automotive electrical repairs. The voltage can also be too high, as often happens when there's something wrong with the vehicle's volrage regulator - and a defective voltage regulator can also drastically shorten the life of your vehicle's battery so if this is the problem you'll want to get that fixed ASAP!

Hope this helps.

Are you talking about the back lighting or the LCD readout?
The light panel used for back lighting does dim as it ages and requires
replacement about every 10 years.
Look for aftermarket replacements on eBay or the usual online retailers.

My condo association has learned to live with the antennaS on my vehicleS,
as there is another ham in my building on the board. They also have NOT
bitched about the small 2 meter dipole attached to my window frame.

Stick that in your holiday pipe and light it up!

discrimination based on race is atgainst the laew. And yet ALL of the
hoas discriminate against Polish-Americans just because of their race
by making a bunch of hoa rules which all discriminate against ther
Polish-American culture near Medina as you can hear here:

http://www.youtube.com/watch?v=lh3a6OT2sGw

And yet the idiot courts have beeeeeeeeeeeeeeeeeeeeepholding such
racial discrimination by ruling in favor of the hoas'  illegal racial
discrimination.

For many years I parked wherever I wanted (except tow away zones) by putting a fake license plate on my vehicle. (I bought it in a garage sale here in Oregon) The tickets would go to never-never land. I was living in the Bay Area down in California. At one time, I was considering wall papering my whole bedroom in uncolletable parking tickets....:^) They are just another way that government has of collecting taxes from people unfairly. It is your duty to cheat them as much as you can.

Radios confiscated in Zimbabwe

Report: Radios used to listen to VOA Studio 7 confiscated in Zimbabwe

Tony Saxon: "Zanu (PF) supporters and self-styled war veterans here are reportedly moving door-to-door here in an effort to prevent people listening to foreign radio broadcasts by confiscating their radios. The people from Buhera said the move was to force people not to listen to the radio reports on constitution making process that is expected to begin next week. An [opposition] MDC T councillor Tapiwa Ngorima said: 'All those listening to radio stations broadcasting from outside the country are being told they will be identified, because they are accused of influencing others to support the MDC in the area.' He said there were some incidents reported to police in Buhera but there have been no any arrests made so far. 'We have cases where our supporters lost their radios after the Zanu (PF) and war veterans accused them of listening to Studio 7. Their radios were forcibly confiscated. We have made reports to the police in Buhera but nothing was done to bring the perpetrators to book,' said the councillor. Studio 7 is broadcast through the Short Wave from Voice of America."

I have a PRO-95 (similar to the -93 I think), have for years. It's a great scanner but with the rebanding law certain trunking systems don't work anymore, also doesn't cover LTR or APCO digital.

I'm looking at the new PSR-310, just received approval and slowly coming into all the online stores. No digital but digital's not worth the money in my location, but it covers Motorola, EDACS, and LTR, as well as the rebanding and the UHF mil-air band (which I've never heard/used).

One of the good things about the PRO-93 and PRO-95 is that if you use Don Starr's programs, you get to enter any frequency except cell, though reception isn't as good/is useless depending on the frequency. (mil air doesn't seem to work)

http://starrsoft.com/

Using a -93 or -95 is OK I guess if you use it for ham radio and non-trunking stuff below the 800 MHz band.

I wouldn't buy a non-rebanding scanner off eBay, and I can't believe
they're selling them, it's just unethical.

looking forward to getting it.  it's only 300 channels, but who can
monitor that many? bought an old pro 2050 on ebay but wanted a hand
held that could scan conventional AND trunked at the same time.
pro2050 is back on ebay...

i run with the local ambulance crew so like to listen to their trunked
motorola system when i'm off duty...and i do communications for the
USCG in NY so have their freqs progammed as well..

so far the county is sticking with the old 800 mhz system. i figured
if they change, i'll only lose the 30 bux i spent on the scanner

you can get ons that do rebandiing for 80-140 or so, but i just wanted
something for my local area and for USCG comms...at a cheap price!

Is there any real need in the US to have the 800MHz phone freqs blocked
anymore??

Bloody annoying that we, who are not Governed by the US, have to suffer
the stupid and unnecessary blocking of 800MHz
In Australia our trunking band finishes partway into the blocked freqs
so trunk tracker scanners have problems
there was never a law here banning these freqs from radios but we had to
suffer it with radios made for the US but sold here

We have had a few "Non US" and even "Made For Aust" scanners here but
making them just for our very small market means much higher prices
ie. the "UBCD996T"(UBC=Aust, BC=US) was AUD$1000 or about US$850 and the
remote heat RH96 was AUD$400

Is there any action being taken in the US towards having this block
removed if the freqs are no longer used for Analogue Mobile Phone
Services?

no one mentioned coded messafges except you,, only ciphers and ciphering.

Of course, NOW I see the emcom people finally got their anti-technical attitude passed into fcc law (or fcc rules, if you prefer),

ever since the FCC allowed emergency drills by employees, that's about all I hear on ham radio anymore in the evenings and on weekends.

No more technical discussions. just practice emcom drills.

Nothing wrong with emcom drills, but

no more technical talk is allowed on ham radio since it's against FCC rules. You can no longer cipher the formulas for the value of resistors, capacitors, and other electronic circxuits because as several people in the newsgroups have already said, "ciphering on ham radio is illegal" and "ciphering isn't allowed on ham radio", and "ciphering on gham radio is against FCC rules".

Emcom finally got their way to eliminate all technical talk from ham radio.

Which was one of the main purposes of ham radio for decades and throughout the whole 20'th century, but no more in the 21'st century.

I can't believe someone can be as ignorant as you sound in this post. I have heard non of the drills you speak of on the air. maybe they are local repeaters where you live - but they are also not allowed to do this every weekend - that would still be against the rules. As for the technical talk BS you are spewing - you're a candidate for the nuthouse.

not as far as i know. phone calls are all digital now. this was a

It's a Fuckwit

He seems to be trying to pull some pity for himself
Buggered if I know for what though

But apparently driving around the streets like a fuckwit and getting pulled over for driving like a fuckwit has nothing to do with his driving like a fuckwit. It's because he has a CB antenna on his car

Some "Home Owner Associations" pick on him, not because he's an annoying fuckwit who disturbs the neighbours by acting like a fuckwit. It's because he has a CB antenna on his car

Seems to me that if he didn't act like a fuckwit he wouldn't have to get on here and complain about all the people who have a problem with him acting like a fuckwit

He's also a lying fuckwit

he said he was going and not going to post here anymore

just ignore the fuckwit

Pulled a long-unused PRO-2006 Programmable Scanner out of the back of a closet. After a battery change on the 9 V battery, seems to work fine in all respects, except that the LCD display has become sufficiently faint (lost enough brightness, or contrast) that it's barely readable, with or without the built-in light on.

Any suggestions for kick-starting the display back to better visibility?

Constant exposure over a long period, to heat or direct sunlight can
cause an LCD screen to "wear out". I have seen this happen on
occasions and a replacement screen usually does the trick.

check for corrosion around the solder joints for the screen
could be causing a low voltage
may even be a dry solder joint

Otherwise look for a replacement from a wrecked radio "Pro2005/2006"

One of his many lies is the one about an ordinance that disallows a
homeowner from having vehicles if they are "Three model years or more" of
age. He left out the rest of the definition in which the ordinance states
that the vehicles must also be parked "in view of a public right-of-way and
are inoperable."
The guy is simply trying to stir the CB types with his silliness.

Anybody that starts their post with an "X-NO-ARCHIVE" is a troll
and needs to be ignored. It must be nice to be able to sit around
the abode all day and think of this silly stuff. Also notice how
he cross-posts the trolling to many news groups at the same time.

I agree with you.
I had long ago accused this person of being a Troll simply because it is so
easy to see through his scat.

He apparently enjoys his forays of misinformation and lies.
One would think that he has too much time on his hands.

Apparently Mr. Radioguy has never excictuted heard of a Federal Warrant for Arrest, under Federal Law, served by US Marshals, who by their charter, have jurisdiction ANYWHERE in US Territory.... A US Marshal is the very LAST fellow you want after you, because he/she has CartBlanc in locating you, and serving the warrant that he/she is operating under.
You NEVER mess with a US Marshal, PERIOD....

Contrary to popular belief, stretch marks are caused by changes in hormones rather than the stretching of the skin. Stretching of the skin plays more of a role in which direction the stretch marks will develop. If you have bright red stretch marks, this means they are newly developed. They will fade on their own, but it could take weeks or even months. Below are some tips to help lighten bright red stretch marks.

Amateur Radio Newsline Report 1727 - September 17 2010

RADIO LAW: NY STATE HAM WINS FOR HAM RADIO IN TROY CITY COURT

A New York State ham ticketed under the states driving while using a cellphone law has won his case in court. This, after a judge affirms that ham radio gear is not hone the same as a mobile phone. We have more in this report:

--

Back on May 30th Steve Bozak, WB2IQU, of Clifton Park, New York, was operating his station while mobile when an officer in Troy New York pulled him over and cited him under the states cellular phone ban while driving law. Bozak, whose mobile was a hand held transceiver protested. Rather than paying the $100 fine he decided to take the matter to court. When he initially lost in Traffic Court he appealed the matter to the Troy City Court. It was there on September 8th that judge Matthew Turner found in Bozak's favor and dismissed the charge.

In rendering his decision the judge found that the Vehicle and Traffic Law defines a Mobile Telephone as a device used by subscribers and other users of wireless telephone service to access such services.   Also that a Wireless Telephone Service is defined as two-way real time voice telecommunications service that is interconnected to a public switched telephone network and is provided by a commercial mobile radio service.

The judge then continued by noting that a review of 47 C.F.R.20.3 reveals that Citizens Band Radio Service and by inference Amateur Radio as well is defined as a private mobile radio service not commercial mobile radio service.

Therefore, the court found that the use of an amateur radio device does not fit the definition of a mobile telephone as defined under the Vehicle and Traffic Law and granted Bozak's motion to dismiss.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

At airtime, it is not known if the city of Troy will appeal the judges decision in Bozak's favor or will simply let the matter drop. And while there have been several attempts at getting the law changed to specifically exclude radio amateurs operating mobile, to date there has been no interest on the part of the legislature to do so. This means that any amateur cited under it has to challenge it as Seve Bozak did or simply pay the fine. (KS4BZ, others)

> A New York State ham ticketed under the states driving while using a cellphone law has won his case in court. This, after a judge affirms that ham radio gear is not hone the same as a mobile phone. We have more in this report:

> Back on May 30th Steve Bozak, WB2IQU, of Clifton Park, New York, was operating his station while mobile when an officer in Troy New York pulled him over and cited him under the states cellular phone ban while driving law. Bozak, whose mobile was a hand held transceiver protested. Rather than paying the $100 fine he decided to take the matter to court. When he initially lost in Traffic Court he appealed the matter to the Troy City Court. It was there on September 8th that judge Matthew Turner found in Bozak's favor and dismissed the charge.
>
> In rendering his decision the judge found that the Vehicle and Traffic Law defines a Mobile Telephone as a device used by subscribers and other users of wireless telephone service to access such services.   Also that a Wireless Telephone Service is defined as two-way real time voice telecommunications service that is interconnected to a public switched telephone network and is provided by a commercial mobile radio service.
>
> The judge then continued by noting that a review of 47 C.F.R.20.3 reveals that Citizens Band Radio Service and by inference Amateur Radio as well is defined as a private mobile radio service not commercial mobile radio service.
>
> Therefore, the court found that the use of an amateur radio device does not fit the definition of a mobile telephone as defined under the Vehicle and Traffic Law and granted Bozak's motion to dismiss.

Which illustrates what I am always bitching about.....The authorities will beat you down with your own money! They will do something unconstitutional to you, and if you want to protest it, you have to spend your own time and money to do so. And then, they will appeal and/or do the same thing to the next guy, and use the taxpayers money to finance their transgressions. So, the citizenry doesn't stand a chance of a snowball in hell of ever getting on top.

The Uniden Homepatrol - 1 looks really cool, but it's still relatively
new. The PSR 500 - 600 models have been around for sometime and their
performance is well documented. Support for the PSR models is also very
good.

Here are a couple of reviews from Amazon:

http://www.amazon.com/Uniden-Intuitive-Touchscreen-Scanner-Homepatrol/dp/
B0045EFZUM

I am a novice to scanning.   I got a new PSR 500 late summer for $389
delivery included on Ebay. I chose this model for its digital scanning
and easy portability using AA batteries -- and of course its good reviews.

Apples are red and oranges are what you get when you mix apples and lemons. Duh!

Kumquats are far superior to either.

Naturally you want the Home Patrol 1.

I mean, fer Chrissakes, it has the word 'patrol' right in its name. If that doesn't just make you want to throw on a hi-vis vest and direct traffic with an overinflated sense of self-worth at the next hamfest or Skywarn gathering, I don't know what would. Well, maybe an 'official' ham radio ID badge, FRS radio, and a clipboard, but let's start out easy and work our way up.

If you need further proof as to why this is the unit for you, look at the software that comes with it: the Uniden Sentinel software. Sentinel. Say it slowly, rolling it around your mouth and savouring its unique textures: sen-ti-nel. Goes nicely with 'patrol', don't you think? Why, you could be the Patrol Sentinel! Or (if you could find a couple of likeminded little whacker buddies) the Sentinel Patrol!

SENTINEL PATROL! FUCK YEAH! ONE OF THEM GOT HIS GENERAL LAST MONTH, YEAH!

Seriously, that would be *so* sweet. Don't forget the lightbars. You *will* need lightbars too.

The PSR scanners are both triple conversion. You might have to email Uniden for their specs. Curious that such a ballyhooed release of a revolutionary scanner would not be accompanied by list basic specifications.

I have read too many posts about the RS scanners not quite matching the bench mark performance level set by their brother Grecom scanners. Grecom manufactures scanners for RS so that leads me to believe that there are surely some corners being cut to allow RS scanners to be sold at a lower price point.

A co worker of mine bought a used Uniden analog trunking scanner for listening to police calls at night. I caught the fever and wanted to buy one too. I soon discovered Uniden digital scanners were indeed quite a bit more expensive. So your argument about preference has some merit.

If you decide to get the Homepatrol scanner, post a review.

This guy carries 30 pounds of tools up the ladder with him? Most

climbers I know take the end of a line with them, then attach a pulley
where they'll be working, then they send the end of the rope back down.
Then the ground crew can send up tools, parts, whatever, and you don't
have to worry about not forgetting anything but the rope and the pulley.

Maybe he works alone...

Glad it worked, and you may well be safe for a while then. The system is not that old and was most likely quite expensive when they bought it. The problems with the frequencies let out to Nextel showed up in time that many places already knew about it when they set up a Mot. 800. that was why we never had to reband here and so your area may also not have to.

There are of course always sales guys trying to push something new, but with the economy the way it is many places are not willing to tell the voters they want to buy some new toy (system) when the old one still works fine.

Actually, companies can do just that.
Being owned by a French company means nothing.
If the company policy says you may not use two way radios on that
property,then you can be charged with trespassing for doing so.

Can a company deny an officer of the law entry because he is armed?
Yes they can. Companies that produce hazardous materials do it all the
time.
 I do not know the legality behind the issue of a search warrant, if a
company can then deny entrance as long as the officers are armed.
After all, a company has the legal right to protect itself and it's
employees from possible harm by outsiders who could possibly ignite the
place on fire.

Not in my house. Without my permission to enter they would have to obtain a
search warrant served by an actual officer of the law.
They are private citizens. They have no authority.
When the FCC makes a bust, they do so with the local cops who do the actual
charging.

Simply by the fact that you own an RF device does not legally grant them
entry. An inspection is not probable cause to enter without a warrant.

I'm sure some have been busted for illegal radio uses and fined but that
was only because the judge wasn't educated on the subject.

After all, just how many inspections can a handfull of people do?

In some areas of the country, failure to abide by Company Rules can result
in the CEO calling in the Police, who can charge you with Malicious
Trespass. The police can then confiscate your radio and, if you resist, they
can charge you with Resisting Law Enforcement, which can be a low-grade
Felony charge. And subsequent to an Arrest, according to the Supreme Court,
the officers are then allowed to do do a search of your vehicle.

Federal Officers are obliged by law to turn off their radios when on private
company properties where the CEO has banned the use of two way radios.
If the U.S. Marshals refuse to do so, the CEO can then call in the local
Prosecuting Attorney who can then cite the Federal Officers and confiscate

their radios if necessary.

The Prosecutor, if the CEO files charges, can also cite the Federal Officers for carrying weapons on restricted property...usually a misdemeanor that results on only a small fine and thirty days in jail. They only have to surrender their weapons for thirty days and will have them returned upon release.

The law also states that the local Sheriff MUST record the serial numbers of the Federal Officers' weapons and that it is incumbent upon the Sheriff of the County to secure these weapons "in a safe and secure manner". Since these weapons are Federal Property, and should the Sheriff fail in his duties, said Sheriff can be charged with Neglect of Office and can be subject to criminal charges.

Little known fact is that the Feds lack arrest authority on private property. They MUST call local law enforcement to make an arrest and the Feds have to show a Warrant, which the local PD is obliged by law to verify before taking anybody into custody.

> Actually, companies can do just that.

The same holds for cell phones, which ARE two way radios.

This as been upheld in several court cases, such as Detective Lon Smith vs. Walmart in 2006.

Walmart Security confiscated the Detective's cell phone when the Detective was calling for backup when needing assistance with his arrest of a group of Gypsies who had stolen several leather coats. Walmart security confiscated the Detective's cell phone before he could complete the call for backup and the Court ruled that this act was well within the paramaters of the rules and regulations set forth by Walmart. The Detective was subsequently terminated for violating company rules.

> Can a company deny an officer of the law entry because he is armed?

Companies that have high security in mind can not only bar law enforcement officers from entering their sites, they can use physical force to disarm any sworn, armed law enforcement officer who demands to enter their sites.

Some companies can even have the law enforcement officers' squad cars towed to a private storage facility and charge a Storage Fee to the agency in question.

In fact, in many states the Company can, if the Agency does not pay the storage fee within 72 hours, legally dismantle the squad car, part for part, and sell the items in auction.

However, Federal Law prohibits the private company from selling any firearms or ammunition that may be in the car. That, by law, must be inventoried and

returned to the Agency within 45 days of the confiscation.
Also, as per a mandate put in place by the Attorney General's office in 2007, all emergency lighting and sirens must be returned to the Agency in question.

Also, posession and use of CB radios in Manufacturing areas is no longer a chargeable offense. The Teamsters Union petitoned for, and was successful in their efforts to force the FCC to change that portion of the Law.
This change, however, applies to trucks that are over ten tons gross vehicle weight. It does not apply to pickup trucks or most vans and it does not apply to passenger vehicles.

I hope by posting this that I can make radioguy aware of the new laws, Federal and State.
I want him and his followers to be on firm, legal ground when reading these posts.

Thats great,

and just be glad that your area hasn't the idiots in charge , that we got.
they went to a P-25 digital system and all medical talkgroups have
been encrypted, so no scanners work ..big whoop...
(did,nt listen to the medical before the change so no big thing for
me,) but the whole concept of going to a common system for the metro
area was to insure that all services could work and communicate.that just
went out the window. no-one can talk to medical and medical can't talk to
fire or police .   stupid
anyway, glad the 2050 is working for you..

Actually NO, the FCC would bring a Federal Marshal with them to do the
Heavy Lifting, in such a case. The FCC Field Agent does NOT have Police
Powers and therefor requires the Federal Marshal to do the arresting, or
if it is a on a boat or Marine vessel, they would get a USCG Officer.
they would only use the local Police, if no Federal Marshal was
available, and the need was critical, and urgent.

A reTired FCC Field Agent... who has called on both the Federal Marshals
and USCG, to provide the Muscle on various occasions.

The question is, can an FCC inspector legally enter a home on the ruse to
inspect an RF device, with the home owner forced to comply?
Not in my house you won't. I don't give a damn how many marshals you got
with you. No search warrant, no entry. The court would side with me.
If the lower court sided with you, then I'd have to take the issue to a
higher court before you got a dime.

See the 4th amendment. "Citizens have the right to be secure in their
home....".

Would you allow a cop to enter your home because he wanted to see if you
had any drugs with no search warrant?
This is precisely why we have the 4th amendment.

I don't think they care anymore, if you don't let them in they will just
file a "notice of liability" or something near those words, fine you $25,000
and let you beat your head in court defending yourself.

The FCC was granted power to do this, like it or not.

I am sure that radioguy is well aware of the rules.

Section 97.1 13(a)(4) of the FCC rules prohibits "messages in codes or ciphers intended to obscure the meaning thereof, except as otherwise provided herein.. ."

Therefore the use of something like Morse code is perfectly legal

Morse code is not ciphering, it is a valid means of communication.

Australia had a Natural Disaster back in 1974 when a Cyclone just about wiped Darwin off the map

in the following days there were Police sent from other states to help out. but it was a nightmare as they all had their own radion equipment and it was completely incompatible making radio comms almost impossible

The State Govts got together and formulated a "Police Band" with 64 channels from 467.850MHz to 469.425MHz to be used Australia wide so that no matter where they were sent comms was possible

the Motorola got into the Police around the 2000 Sydney Olympic Games and convinced them to go for an P25 digital radio system, The same as being used by the ACT and Northern Territory Later QLD also went the same.

However Tasmania went for an 800MHZ Ericsson EDACS system
South Australia went for a 400MHz encrypted digital trunking system
Western Australia went for a 420Mhz non trunking digital system
and Victoria went for a 400MHz encrypted digital trunking system

Now the only stated capable of communication between states ins NSW/QLD/NT and ACT

the rest have completely incompatible systems

so much for their disaster plans

These people need to have their butts kicked hard in court.

No HOA has authority to persecute someone who has not signed the agreement. They sure as hell don't have authority outside of their property, which is what a public street is.
If a judge is siding with the HOA, then that means the judge is taking kickbacks from them.

You need to research the state law on what all it allows an HOA to enforce. That clause you give sounds fishy and may not be legal.

What do they do when a cop shows up at a house? Have his car towed and fine him for the infractions?

Here's something you can try. Gather up 20 or so CB'ers and have them come park in front of your house on the street. Make sure they all have visibile antennas. When the tow truck shows up, advise the HOA people he's violating the clause because of his two way radios. Not to mention his 'Obnoxious activity'. Then, call the cops and file charges of grand theft auto on them.

BTW, aren't HOA's requried to have elections for the board of directors?
What's preventing you from getting involved and getting on the board?

My brother is on his HOA's board now and he wasn't even looking for the job.

It's time you took legal action these assholes.

If this is in arizona here's some legal information for you.

Section 1. Title 33, chapter 16, article 1, Arizona Revised Statutes, is amended by adding section 33-1815, to read:

33-1815. Community authority over public roadways

Notwithstanding any provision in the community documents, an association has no authority over and shall not regulate any roadway, easement or other area for which the ownership or use has been dedicated to a governmental entity or that is otherwise under the legal authority of a governmental entity. An association has jurisdiction over only those roadways, easements and other areas that remain under the ownership of the association.

So if you are now fined by the HOA, take the bastards to court and challenge.
IOW, the HOA can not legally fine anyone, resident or not, for any parking infraction on a public roadway. Even if they use the "obnoxious activity"

clause.
They would have to prove that the roadway is their property and has never been "dedicated" as public use. If the community is not gated, nor have the streets marked as "private property", they are screwed.

Hi I have just purchased a base scanner (Commtel COM205) once I got it all set up I was given a Realistic Pro 2042 with aerial, I have also ordered an MRP-2000 MK2 pre-amp, I am a little bit akward as I would like to connect everything up as follows,

2x aerials into coupler then into the pre-amp, split out of the pre amp into the two scanners,

I dont know how fussy the scanners and pre-amp are with relation to impedance/ load so I would like to draw on everyones vast knowledge and seek advise.

Thanks

Steve

That lot should work fine as long as you use proper diplexer for the two antennas(why two antennas though? are they for different bands??)

and just a normal antenna splitter from the amp to the radios

use 50ohm cable, splitter and diplexer and you'll be sweet

I was thinking about using two different antennas as They are different
styles and I guess they will have different "sweet spots" thanks for
your info I think I might just swap between the two antennas until I

decide which one is better.

Thanks

The best option is to have an antenna for VHF and one for UHF close to
your favourite bands, this way you have max signal for your favourite
stations and they will still work fine for the rest

Hello,

I am working (or attempting to) with the Motorola MT2090 barcode scanner. I have placed some files on the desktop that I am trying to execute. When the device boots up I am able to see the desktop, but it is quickly replaced by the Home screen. I cannot figure out how to get back to the desktop to execute my files. I've browsed to the files through the file manager to execute the files, but they just seem to run in the background.

Does anyone know how to disable the home screen so you can just run files from the desktop?

Guys

The RNLI have new pagers, they "beep" then there is someone speaking describing the nature of the callout, has anyone worked out what frequency they run on.
There is a PC based pager but this is considerably delayed!

LOL :-) no RNLI stands for Royal National Lifeboat Institution they are
a volunteer association that deal with sea rescue in the UK.

I have a Radio Shack Pro90 which I am in need of a service manual or at least a schematic for this thing. The squelch is stuck open and as a result only the trunking scans properly. Normal channels won't scan because of the problem it has. If someone has either available and can scan the appropriate section I would greatly appreciate that. I'm not sure of the Uniden version of this, but most likely this is the only thing that may be found. I'm sure Rad Shack never did release any information on this thing to anyone.

Thanks in advance for any assistance.

Although Federal law says it is ok to listen to police transmissions - many states have laws about scanners mounted inside vehicles. This is to prevent a criminal from using a scanner in the commission of a crime - good idea.

And those states - just about every one of them, exempts licensed hams from those laws. The main reason is that many mobile ham radios are, by design, able to receive those frequenices. My thinking is that if the licensed ham were to use that knowledge in the commission of a crime, then his radios would also be considered burglary tools and he would have them confiscated just like any other scanner.

Hams also do so much public service and EMCOM, that the states realize that in some cases they may need to listen to public service frequenices in their vehicles.

And yes, this scanner law does exist and the fact that licensed hams are exempt does not invalidate the law for everyone else.

The interpretation as to what "mounted in a vehicle" means, is best determined by individual state statutes. In Florida, for instance, mounted means operating from the vehicle's battery power and an outside antenna attached. Handhelds are legal. Or that was the way it was the last I knew.

The federal ECPA law which states it shall not be unlawful to monitor police transmissions.

Federal law supercedes any local or state law.

Federal pre-emption.

This guy is soo mixed up and full of shit it isn't even funny.

Listen, first off, HOAs can only regulate property they own or have purchased. If, in fact, they purchased the property which this house sets on, then they CAN insist that the new owners must sign a CC&R and join the HOA before finalizing the purchase. Otherwise, they can't do this unless the previous owner agrees to this provision.

As for a license for CB operation, this is also a bunch of BS you are spreading around. ONLY the FCC can regulate the operation of CB radio. yes, there was a provision that local pd has the right to investigate complaints involving CB interference and so on, but this does not include the ability to license and regulate the CB operator. Also, if the CB operation is legal, then the locals cannot prohibit you from operating. Junk consumer devices are just that and under Part 15 of FCC rules, they MUST accept interference. This interference cannot be caused by illegal operations, however. The FCC is the only agency who can tell an operator to shut down his station. If there is interference which cannot be eliminated, then a call the FCC will result in an investigation. If the FCC determines that the transmitter is operating within the regulations, then it is the device owner's responsibility to either replace the defective unit or have it repaired so there is no interference.

As for adding filters to televisions and they break - this is impossible. Connecting anything of a filter to a TV will not cause it to blow up, stop working, or break in general. This can't happen - period.

If your "legal eagles" are telling you things otehr than this - they are lying to you. If you are just making this shit up - stop doing it! And if that is the case, you really are the IDIOT everyone here says you are.

thankfully, I don't have a hoa and I currently live on non-hoa non-CC&R property in a non-hoa non-CC&R house.

When I was visiting certain places,, everyone was supposed to park within the white lines, but my car was over ALL the lines no matter which way I moved it to no matter where I moved it to. The left titre was too far to the left over the left line at the exact same time the right tire was too far to the right over the right time at the samee time the front wheels were too far forwards over the front line at the same time the back wheels were too far back over the rear line.

Why don't they make the lines so that legally registered cars with current valid plates will fit inside the lines? Becaue if they do, then they can't tow you and make all that money from their friends who own and run the towing company and have your car impounded for doing so.

First off, they are located out in the county and aren't part of the HOA. >>>The new subdivision has ONE house in it and nobody is even living in it. Talk about BS. Their fighting it by >>>the way

Yep. the same thing has happened around here. When we moved in, this was a non-hoa non-CC&R neighborhood with many of the houses on the street built by my family. Then just a few decades later, developers building the condos and townhouses requiring non-revokable permanen CC&Rs an d hoas moved into the township and built them so small that a whole bunch of pro-hoa people now outnumbered the longtime residents who built this community and elected their pro-hoa friends to local government positions which then passed new laws that many counties are now passing. Laws which say you are NOT allowed to buy or sell a non-hoa non-CC&R home until you add non-revokable CC&Rs which run with the land forever and REQUITRE the buyer to join a homeowner associationn (or homeowners associations) to the home and property and may not be eliminated by any future law passed by any local,county, state, or the federal government. (according to the laws).

Because of this law, what was once a non-hoa non-CC&R house on non-hoa non-CC&R land on our street is now a couple of townhomes with CC&Rs and hoa restrictions on CC&R land requiring anyone ligving on that land to join a hoa and follow teh hoa rules.

The hoas kerep trying to argue that there is no possible way that CC&Rs and hoas can be added to the deeds of non-hoa non-CC&R land.

Yes they can. I have seen I have seen it done. If they couldn't, there wouldn't be that new two townhomes with CC&Rs and hoas on my street which was prevuiously non-hoa non-CC&R land with a non-hoa non-CC&R house, yet there is.

The original house was torn down and replaced by two towbhomes. yes, just two. so far. With people living in them who are now subject to hoa rules ans CC&Rs.

The original house was torn down because since it was a non-hoa non-CC&R home long here decades before any hoa moved into the township, it was and still is against the law for the seller to sell it until permanernt non-revokable CC&Rs requiring the buyer to join a hoa and follow all hoa rules are added to it and against the law for the buyer to buy a non-hoa non-CC&R house until permanent non-revokable CC&Rs requiring the buyer to join a hoa and follow all hoa rules are added to it.

With so many hoas now near me, but me on non-hoa non-CC&R property, I'll be glad if all of their consumer-grade junk gets constant interference from my legally operating legal CB.

And maybe from an all-band ham radio also if I can pass the ham radio tests, extra class.

Lawyers will tell you you can get sued (and lose) by them for causing damage to their consumer-grade junk if you even so much as recommend they install certain filters (even without installing them yourself and with them installing it theirselves) if something happens to their device after they intalled it becaue of your recommendation to install it.

When his tv goes kablooey in the next year or two he says "He told me to install that certain filter so I did and it ruined my tv which won't work anymore because I used the filter he said to which if I didn't use, my tv would still be working".

And since you hoas like to bring up contracts so much, any ham who moces into a hoa and does NOT put up a huge tower for reliable emergency communications is violating their contract with the FCC that they had to sign when they took a ham test.

For intance, I will someday have to move out of here. The only places left all have hoas and CC&Rs. But a cop has already previously ordered me to have ham radios for effeective communication anywhere I move to.

While you can do some without a huge tower, you can not do "effective" without a tower.

It is against state law here to disobey an order of a cop.

So I have already been ordered by law to violate any hoa covenants any place I move to.

Some lawyers and judges would even say that counts as a verbal contract between me and the officer since I said okay in exchange for not being arrested and taken to jail for having my legal unmodified FCC-approvved 40 channel CB without the required amateur radio license permitting me to have a 40 channel cb and permitting me to conduct amateur radio operations on the 40 channel CB band and ONLY amateur radio operations on the 40 channel CB band. CB communications not allowed on the 40 channel CB band under that license.

Since the FCC does not issue such licencers, this license is issued by the county next to mine. Not my county.

At first I thought such a law was illegal, but most peoplein these newsgroups have constantly and consistently stated that county and state laws are allowed to be more restrictive than federal law.

So since this law is more restrictive than federal law, it is completely legal and I must get an amateur radio license from the county next to mine permitting me to conduct amaterur radio operations, only on the CB band, and permitting me to even own a CB radio since my FCC-legal signals can be heard in the county next to me (therefore illegal by that county's standards and laws) even though I don't reside in that county.

The policr in that county don't like me operating a CB radio which can regularly be heard in that county (completely barefoot FCC-legal CB) without the appropriate county-issued amateur radio license permitting me to even own a cb besides permitting me to even transmit on a CB.

Well, all the legal-eagles are going to get angry at me for this since it is breaking the law, but I am NOT going to pay to get such a permit. I feel that the couinty next to mine has no business telling me what I may and may not own and what I may or may not transmit on, and when I may or may not transmit on when I do NOT even reside in that county.

So they're going to HAVE TO put up with my FCC-legal Cb transmisions without me getting their radio permit, whether they like it or not.

Of course, now the legal eagles will say that I must get such a permit to transmit while I'm within that county, (which I am frequently since it's right next to mine) since it's the law that I must.

Well, I say screw them. AAccording to FCc rules, I don't have to, and the way I read the FCC rules, such laws are illegal even though they are more restrictive than the FCC rules.

The problem is I can't afford to fight them when they ticket, fine, and arrest me for obeying FCC rules instead of their county laws regarding radio transmissions and radio licenses.

To them, the FCC has given them complete authority over all CB radios.

SOMETHING CALLED HR2346

although tyhe following isn't the law of the county next to mine and has nothing to do with requiring radio licenses for cb, it is another town in wisconsin who thinks they have authority to prevent FCC-legal

CB radio transmissions if it interferes with anyone's consumer-grade junk.

They say the FCC-lergal cb operator must stop transmitting if it interferes with any consumer-grade junk or else it's a violation of the town ordinance which the cber can be fined and arrested for.:

2) It shall be unlawful to operate any Citizens Band (CB) transmitting equipment with the intent of causing malicious radio frequency interference to Radio, TV, and Telephone Receiving equipment. The scope of this ordinance shall be as outlined in PL106-521 and shall follow all guidelines as set forth in the appropriate Federal Communications Commission (FCC) regulations.

Any CB operator who unintentionally causes radio frequency interference shall, after being formally informed, take any and all necessary action to eliminate the unintentional interference. If such an action cannot be met, the said operator shall cease to operate his equipment until such time as appropriate action can be taken by the said operator to cure the unintentional interference caused. If said operator continues to operate after this time and still continues to cause interference, such shall be in violation of this ordinance.

Any CB operator, who after investigation is found to cause intentional, wanton, malicious radio frequency interference as outlined in PL 106-521 and the appropriate FCC law, is in violation of this ordinance.

Exempted parties are defined as those licensed entities specifically mentioned in Public Law 106-521 and the appropriate FCC regulation(s).

(3) This section shall not be construed to embrace or cover the regulation of any transmitting, broadcasting or receiving instrument, apparatus or device used or useful in interstate commerce or the operation of which instrument, apparatus or device is licensed or authorized by or under the provisions of any statute or federal regulation. (2) When it appears to the police department that any machine, device, apparatus, or instrument is causing interference of the type prohibited herein, the police department shall serve written notice upon the person in charge of the machine, device, apparatus or instrument setting forth the basis of the complaint, and thereupon it

(3) If upon said demonstration it is found by the police department that any machine, device, apparatus or instrument is causing interference of the type herein prohibited, it shall be the duty of said person in charge within 30 days after written notice has been served upon him to entirely abate and discard the operation of such machine, device, apparatus, or instrument, unless it can be shown that the machine, device, apparatus or instrument can be adequately and practically filtered, shielded or otherwise remodeled so as to permit its operation without violation of this section, in which event it shall be the duty of said person in charge within the said thirty (30) days to properly filter, shield or otherwise remodel such machine, device, apparatus, or instrument so as to reduce said interference to within the limits set forth in this section. In the event such person shall fail to remedy such defects as hereinbefore provided, he may be prosecuted upon filing proper complaint.

And I have news for you hoa nimbys. Several U.S. states depending on the state, have either already passed or are in the process of passing laws making amateur radio by law, a part of U.S. national Homeland Security.

Even though the rest of the world (and the few hoas smart enough to look up the law and their lawyers) claim that is a violation of international law requiring amateur radio operators to "promote international goodwill" since doing so requires amateur radios to help illegally taking over other countries pre-emptivvely which does the opposite of promoting "international goodwill" .

Now before someone tries to arrest me for saying that, it's not me who said that. It's the rest of the world who said that.

true, but it seems to be getting close.

or I should say "closer".

But as usual, the problem is with the locals, not with the feds. Even
in your example, the problem you had is with the locals, not with the
feds.

From the actions of the hoa nimbys across the country, we can very
easily see that this country would be a total mess without the federal
government in charge.

The city here went to 800 about 8 years ago and I tried several. The Radio Shack 800 one seems to work better than anything else I have tried, at least here. I can seem to pick up things well until the Police get so far away the radio in their car is having trouble getting through.

Screw on a BNC?  There are NO screw threads on a BNC.

It's not threaded. There are two diagonal guide slots on the antenna collar
that fit over two pins of the antenna base of the scanner. The antenna is
supposed to install by pushing down slightly and giving it a 1/4 turn
clockwise until the antenna base pins settle into a depressed groove at the
end of the diagonal slots.

The angle antenna I got is new but it doesn't have any give when being
pushed down over the antenna base of the scanner.

...Which means that it is NOT screwed on. It is put on with a 1/4 twist.

Screw: screw (skr) v. To rotate (a part) on a threaded axis.

There are no threads, therefore, it can't be screwed on.

 If its new, then probably someone at the factory put two wave washers or
crimpped the slotted collar improperly.

short of forcing it.  not a lot you can do about it..except

I would NOT try to force it onto the scanner BNC. too much chance of
causing damage to the plastic case on the scanner. I would try using a
disposable or scrap BNC connector, put some WD-40 on it and work with it..
see if it can be losened up.  else, chuck it in the circular file..

Is there a repository of old Police Call books anywhere for purchase or download in PDF format? I'm looking for either the 2003 or 2004 edition (that had the Pozilla software CD). I just want to get a copy of the entire book in electronic format.

Thank you for any help.

I'm looking for a website that has live scanner feed(s) for Los Angeles County Fire, also Police, in the West Valley, Topanga Canyon, Malibu areas. Is it possible to get this specific, I'd like to know what's going on (especially fire-wise) when the sirens go by my house as they've been going all day today.

Thanks, jc

I have an old handheld scanner, Regency HX 1500, never used it much but it's been stored for many years. I'd like to power it up to see how it's working...but the battery compartment has the blue crud on most of the terminals. In the past I've tried to clean this off with rubbing alcohol but it always returns. Is there a better way to do this?

I could also try to run the scanner with an adjustable power supply, but the metal tag on the bag lists two power sources: AA Ni-cad batteries 9.6vdc and/or AA battery 12vdc. If I plug in the power supply through the "charge receptacle", which voltage should I set it for? And should I use the negative or positive pin configuration on the power supply.

On the radio where you plug the DC power connector in should have the
voltage and the polarity for the power

Use that as a reference and then use a power source to match the radio
not the other way round

Try a small amount of white vinegar on the terminals, followed by
electronic contact cleaner.

Each year there were 9 regional editions issued.
Getting just the CD in electronic format will not work.
Each book had its own CD that required you have the book to unlock the
CD.
Thew unlock code would be a word from a certain page of the directory.
To access the users manual you had to have an internet connection.

The POLICE CALL frequency directories came in the following versions:
volume 1   Northeastern states
volume 2   Mid Atlantic
volume 3&4 Upper midwest
volume 5&8 Rockies and Central USA
volume 6   Atlantic Southeast
volume 7   Central Southeast
volume 9   West Coast

Thanks for the suggestions, I'm glad to have an alternative to the alcohol.

This scanner must be set up for recharging, it has two charging terminals
about an inch apart, and in between these is a hole with a pin inside. The
letters "CHG" are below this hole. The tag on the back of the unit says
this:
Power
AA Ni-Cd battery 9.6V dc
AA Battery 12V dc
Caution: Install proper batteries before using charger.

I was presuming I could plug a power supply into the hole with the pin, but
I'm really not sure about that.

John

TROY =97 Amateur radio enthusiasts are abuzz on the airwaves over a traffic ticket Steve Bozak received Sunday in Troy as he talked to his buddies over the very same frequency.

Bozak, who owns an antenna company and has been using so-called =93ham=94 radios for 34 years, was pulled over at the intersection of 15th and Hoosick streets while on his way to breakfast with fellow enthusiasts of the technology. He was slapped with a ticket for talking on a cell phone while driving, and he said Officer Mark Millington dismissed his claims that the radio was not in fact a telephone.

=93He assured me that I could not be speaking on that cell phone while I was driving,=94 said Bozak, who lives in Clifton Park. =93I mentioned to him politely that it wasn=92t a cell phone but an amateur radio. He assured me that it was all the same.=94

The section of New York=92s vehicle and traffic law Bozak was cited for violating, 1225-c, requires a phone to be =93in the immediate proximity=94 of the driver=92s ear. It defines the types of communication devices it applies to as ones =93interconnected to a public switched telephone network =85 provided by a commercial mobile radio service.=94

On its face, the statute does not appear to refer to devices like a ham radio, which transmits its signal across the same airwaves as devices used by emergency personnel to communicate with each other and with dispatchers.

Such radios do not require the user to place the device to his or her ear =97 they are typically played over speakers =97 and need only be held while the user is actually speaking.

New York is among eight states with a law banning the use of cell phones while driving. Washington=92s law specifically excludes ham operators, who must first be licensed by the government to use the airwaves.

Bozak, who became licensed in 1976, said he believes the bulk of users have the devices in their vehicles. He said many are up in arms over the ticket, and some were audible on a scanner Wednesday voicing their displeasure over their radios =97 many of them while driving.

=93I don=92t know how many cops I=92ve been around in how many different states, but nobody ever said a word to me,=94 said one man whose job takes him on the road.

Ultimately, a Troy City Court judge will decide whether the ticket issued to Bozak is acceptable under the state=92s law.

Sgt. Terry Buchanan, the Police Department=92s spokesman who worked traffic patrols for years, said he doesn=92t recall this issue coming up in the past. He said the department would have no comment on the matter because it is still pending in court.

Bozak is scheduled to appear on June 23, and he said more than a dozen fellow radio enthusiasts plan on being there with him.

He faces a $100 fine, according to the statute.

=93I=92ll have my day in court, and we=92ll see how it goes,=94 he said. =
=93But
I certainly have every intention of pushing this politely, and through the right methods, to get it resolved.=94

The date may be pushed back because Bozak has requested a supporting deposition from Millington, who is typically assigned to Troy=92s public schools and rarely works traffic patrol.

Bozak wants Millington to detail what happened and explain how he was breaking the law.

=93He=92s going to have to prove that I was on a cell phone, which is going to be hard to do,=94 he said. =93I wasn=92t on a cell phone.=94

Dude, don't you think it's about the same thing?

Right's right and wrong is wrong. If he was distracted then he shouldn't be on the radio.

I pull over or use a speakerphone. So should everyone!!

Typically it's the data radio used in things like weather balloons there is decoder software available so you can monitor the device's location and plot it on a map, shows altitude and direction of travel

Some people use it the track and locate the equipment and return it top the owner

�I�ll have my day in court, and we�ll see how it goes,� he said. �But I certainly have every intention of pushing this politely, and through the right methods, to get it resolved.�

The date may be pushed back because Bozak has requested a supporting deposition from Millington, who is typically assigned to Troy�s public schools and rarely works traffic patrol.

Bozak wants Millington to detail what happened and explain how he was breaking the law.

�He�s going to have to prove that I was on a cell phone, which is going to be hard to do,� he said. �I wasn�t on a cell phone.�

I've been stopped and ticketed numerous times in NYC when
using a transceiver.

I appealed the tickets, bringing along a copy
of my ham ticket.

Usually the judge dismissed them.

Talking on a cell phone while driving is distracting. Hands-free
is not an excuse - and it's not safer. There have been studies to

demonstrate this. If hands-free operation of a cellphone is legal and handsful operation is not, it's because lawmakers are either idiots or they want to continue talking on their cell phones while driving. Try brain-free cellphone operation (it's called putting the cell phone on "silent ringing" (*NOT* vibrate) and letting voice mail take messages which you can handle when you reach your destination or stop for gas or a restroom break).

Hold it or not hold it, it's still not safe if it's a cellphone.

I suspect the nature of the conversation has a lot more to do with why ham radios and cb radios are safer, if, in fact, that's true. I don't think there have been any studies investigating this for ham radios and cb radios.

Handsfree on cell phones is not safer and it should be illegal to use it while driving.

Some cell phones with bluetooth allow you to originate a phone call with your cell phone in your hip pocket (so you can't press *ANY* buttons on the phone, or get it out of your pocket without removing your seat belt) by pushing a button on your earpiece, speak the name of who you want to call (this required voice training ahead of time), talk, then push a button on your earpiece to hang up. This is not safer, but it's a much better approximation to real hands-free.

It should be self-evident to even a child that in this day and age, walking into an airport wearing a shirt festooned with wires, batteries and blinking lights is an extremely BAD idea. Have you never heard of suicide bombers? The fact that the shirt is actually a star trek product is irrelevant. How is the TSA supposed to know at first glance that the shirt is "an official Star Trek product" and not some kind of bomb vest?

Yeah, 25 years ago, nobody would have cared, but circumstances have changed. There are appropriate places to wear such a shirt, but the security line at an airport is most definitely NOT one of those places.

You could go to a toy store and buy a legally-marketed, legally-purchased toy plastic gun, but what do you think would happen if you walked into an airport, or a bank, or a police station with that (admittedly legal) toy gun in your hand? You'd be damn lucky not to get your head blown off on the spot - and anyone idiotic enough to do such a thing would deserve it if that happened.

It's appalling that you're so stupid that somebody actually has to explain this to you. You have about as much common sense as a pile of rocks.

Thats easy Tholen. One just waits in the men's restroom at the
Institute for Astronomy. Then one sticks their cock thru the hole in
the stall wall. When one feels another's mouth on their cock then one
knows that they are, in fact, receiving oral sex from Tholen.

What does your ridiculous question have to do with OS/2, Tholen?

There is no such institute in the town of Tholen in The
Netherlands, Kd8ctl.

What does your classic erroneous presupposition have to
do with OS/2, Kd8ctl?

9> When one feels another's mouth on their cock then one

How does one have oral sex with a town in The Netherlands,
Kd8ctl?

9> What does your ridiculous question have to do with OS/2, Tholen?

I didn't ask any ridiculous question, Kd8ctl, but the question I
did ask has "OS/2" right before the question mark. Suffering from
reading comprehension problems, Kd8ctl?

- Better URL:

- --

FYI - The Shortest Usable eBay URL/Link is :

http://cgi.ebay.com/280556096743
Made up of : http://cgi.ebay.com & "/" & 280556096743

Note the 'cgi.ebay.com' -not- www.ebay.com

That's : http://cgi.ebay.com/[with the Item # attached]

hope this helps in the future ~ RHF

Why would you ask such a question here? The answer is readily available on the web sites of the three networks you mentioned.

Are you so bloody stupid, or lazy, that you can't be bothered to look this information up for yourself?

>>>You can be assured that all planned developments will contain antenna re=
strictions. It is in the land >>>developers best interest and makes sense. =
They do not want 100 ft. towers springing up. In fact, there is a >>>phrase=
 about operating rf transmitters, excluding the obvious garage door openers=
 etc. Is there room for >>>verticals and wire antennas? I would think the a=
nswer would be yes.

They don't even want antennas on vehicles. Not even if you're just visiting.

Before, I have had my vehivle towed for violating homeowner association rules and had to pay so much money to get it back out of impound, money that I couldn't afford to pay, which ruined my credit for the rest of my life. And I don't even live in a homeowner association. I was just visiting my mom there. And that place did not have a homeowner association when she moved into the trailer park. It was added later.

And when I visited at my uncle's house in a different city, the hoa complained to him about the CB antenna on the car in his driveeway, fined him, and said it would be towed away if they ever saw it there again.

He does NOT have a car with a CB antenna. That was MY car. So far, I have never ever signed any agreement with any homeowner association at all. I live on non-hoa non-CC&R land.

What gives you nazi hoas the right to tow MY LEGALLY REGISTERED CAR for violating hoa rules when I NEVER EVER SIGNED ANY fricking agreement with any one of you?

Just because I'm visiting one of my relatives, none of whom could find any place without a hoa attached to ity anymore.

And no you can not "just buy a house without any hoa or cc&Rs".

Several counties' laws through zoning law and other law now requires any non-hoa non-CC&R homes to have permanent CC&Rs requiring joining a hoa added to it before the owners of the non-CC&R non hoa houses are allowed to sell them.

So the very act of purchasing a non-hoa non-CC&R home automatically makes it a CC&R hoa home.

And besides, as I said, I don't live in a hoa cc&R home. I cirrently

DO live in a non-hoa non-CC&R home.

So how is purchasing one, if I could, which I can't, because of the newer laws, solve that problem???

I was STILL towed for violating homeowner association rules of places I was visiting when I do NOT live in a homeiwner association and have NOT signed any agreements at all with any homeowner associations.

I have NEVER signed any agreements with the hoas who towed me.

The traler park did npt have a visitors parking area because the hoa owner of the trailer park required all visitors to park in the driveways of the person they were visiting.

My uncle's house did not have visitor parking area because it was his own driveway in his own house and that city has laws which say it is against the law ro park on the street at all, either side, no matter what time of day or night or what reason.

So it is now very very clear that the FCC has comitted the federal crime of fraud when they fraudently said that hams "can just operate mobile".

You can NOT operate mobile when your car keeps getting towed for violating the homeowner associations' rules of "no external antennas allowed on vehicles" and "no ham or cb antennas allowed on vehicles" when you DON'T EVEN BELONG to any hoa and NEVER SIGNED ANY agreement with any hoa at all.

Just because you're visiting family and friends who live in homneowners associations, the only places left anymore.

And no, you can't sue. 1. It costs much more to sue them for it than it does to pay to get your car out of impound for violating homeowner association rules that you never agreed to and that the homeowner association doesn't have to tell you what the rules are since you're a visitor instead of a resident."

And people have spent over twenty thousand dollars in legal fees just trying to defend their right to park in their own driveways when driveway parking was allowed but the rules of the two hoas in charge of the place conflicted with each other.

2. Most lawyers will not take such cases anymore because they will be disbarred for doing so, since it is a "conflict of interest" since most are now required by the counties,cities, and/or state to have agreements with the hoas and hoa developers to defend them.

3. There have been so many lawsuits brought against hoas that most courts are now refusing to hear the cases involving hoas unless they're sure they can rule in favor of the homeowners' associations and against the homeowners.

And in California, because of the number of hoa court cases filed, California, by law. ruled that all hoa disputes must now be settled only through arbitration and not in the courts because it was overburdening the couyrt system.

I haven't even visited some of my family in years.

I'm sure their hoas would definitely tow my car and/or fined them or me for it ljust like all the other ones did.

And I can't afford such tow bills to get the car out of impound, or the fines.

Now the question is WHY did the FCC commit the federal crime of fraud by fraudently telling radio operators that they "can just operate mobile"? WHY ?????

And how do we operate out CB radios mobile when our cars keep getting towed and impounded by homeowners associations we never ever made ANY agreement at all with since we live in non-hoa non-CC&R houses?

And you don't even need an antenna on your car for it to happen. This issue is BIGGER than just radios.

It also happens if you just have "amateur radio plates" on your car without any antennas or radios at on or in your car.

Because homeowners associations don't like amateur radio locense plates on vehicles either, even if there's not any antenna or radio in the vehicle.

They also tow visitors for violating the homeowner association rules of what color car you are and are not allowed to have, what make and model of car you are and are not allowed to have, what type of vehicle you are and are not allowed to have.

What gives you nazi homeowner associations the right to tow my car and have it impounded just because it's blue, a color you don't allow under hoa rules, when I NEVER EVER SIGNED ANY agreement with you at all???????

Now there'sd even some municipalities requiring mandatory for homeowners to simultaneously join three homeowners associations for the same house!!!!!!!

Of course, the rules for each condlict with the other two.

One only allows your house to be painted blue because all the other colors are ugly and bring down property values while blue is a pretty color that brings up property values and the hoa rules specifically say "homes are not allowed to be painted any ugly color".

while the second hoa says houses are only allowed to be painted red because all other colors are ugly and bring down property balues while red is a pretty color that brings up property valuesd and the hoa rules specifically say "homes are not allowed to be painted any ugly color".

while the third hoa says "houses are only allowed to be painted green because all other colors are ugly and bring property values down while green is a pretty color that brings up property values and the hoa rules specifically say "homes are not allowed to be painted any color".

If I lived in a home requiring three hoas like many do now, which I don't, I would paint the one house red, blue, and green to follow all hoa rules except that wouldn't work either since doing so also violates all of the hoas' rules.

You CAN't paint it red while not painting it red, or paint it blue while not painting it blue or painting it green while not painting it green.

hmmm... Since I would be getting fined and the house having a lien put on it either way in that case, I may as well go all out and paint it all three colors that are both not allowed to have that color painted on it and required to be the ONLY color the house is allowed to be painted.

On second thought, in that case, I may as well go all the way and paint it in glow-at-night colors purple and pink with polka dots

Where do you live? What kind of system are you trying to listen to? If you do not know, or are not sure, the Radio Reference page is often a great place to start.

It says this is Motorola Type II SmartZone. Most of this you can listen to.
Anything with an A means analog, that scanner can pick it up.
<http://www.radioreference.com/apps/db/?sid=724>

Countywide Police Talkgroups
East System Police Talkgroups
West System Police Talkgroups

That is just the Trunked Police, They list a lot of conventional too, which
that scanner also can pick up.
There is also Fire, and a whole lot of other stuff listed there in your
area. Should keep you busy a long time.

cool! Thanks much!! I paid $40 for the scanner, but I don't know if
this area has been 'retrunked'...so if this works, it'll be a damn
cheap scanner. the scanner says it can copy type II systems...but
from what I've read, most radio systems have been 'retrunked'..so
we'll see

I think what you are trying to say is re banded. For several years now the FCC has been talking about this. Some one dropped the ball with Nextel, letting them use frequencies too close to the ones they were licensing to Cities and such. Not all area's had this problem. We have the same system here and it has never changed. If they do reband then that scanner will not work on the 800 there.

A couple easy ways to tell. If you have the manual try to program in some of these frequencies.

866.03750   866.32500   866.55000   866.77500a   867.13750a
     867.65000a
868.45000c

If the scanner will take them, you are in. You can also set it to service search in the Police 800 band and see what it's picking up. It's an old scanner but if the towns have not rebanded it should work fine.
Have fun!

I think drug tests are great. Since I have to pass them to earn money to pay taxes, Everyone on, or applying for welfare should have to pass them to get some of my money.

Hello,

Have been away from the hobby for a while now.

I have a GRE 500 handheld unit, which I like very much.

I understand that GRE has had a new handheld unit out for a while.
More bells and whistles than the 500, I guess.

I'm in my 70's now, and frankly not that sharp with unerstanding the
technical specs anymore.

Might anyone please outline for me, and describe, what the new one
offers over what I have now ?

Worth considering an upgrade ? Why ?

BTW: Is there an even newer one expected "shortly" ?

Live outside of Boston, and use it mainly to monitor local PD and FD, as
well as some Aero from Hanscom and Logan.

Much thanks,
B.

I assume this program supports the Pro-84 as well, but how about the Uniden BC95XLT?

I have all three scanners, which are really all the same. It would be nice to have one program usable with all and able to share data files.

I went to your web site as indicated below, but could not find that kind of information.

The new unit is a Analog Trunk tracker the 310X/410X. It is an upgrade of the 300/400 series due out in the Fall of 2010. The 500 is the latest Digital Trunk tracker from GRE. GRE is also set to release a clone of the PRO-107 iScan radio and Uniden will announce their 'iScan' version on July 1st.

I'm probably wasting my time here, but I have a rare one for sale.

I bought it factory fresh in 2004 from a dealer in CA who quit the business in 2008.

It's a beautiful rig, but I don't use it any more and figure someone out there will. It's in absolutely UNUSED condition and comes with the original box, manual, accessories, leatherette case, ALL the slot cards, an extra 800MHz Austin antenna, and an attribute consumer versions DON'T have.

I'm only looking for a fraction of what I paid for this kit, so if you're interested, you'll have to drop me a private email for the terms of the sale. I guarantee your satisfaction, and 3 Day shipping to your door.

Seeing is believing and I'm prepared to forward a photo, but only by request. Please contact me at: tulsa...@yahoo.com

Hello,

For an antenna to be mounted in my attic, and for the typical scanner
frequencies, am I better off with a Disconne, or with a
Scantenna brand antenna ?
Why ?

Also, am I right that the Scantenna is Omni-directional ?

Thanks,
Bob

The scantenna I am sure does have some Gain on UHF freqs(none on VHF)
and they are better on certain bands

The Discone is Unity gain(no gain) across it's freq range but is a true
wide band antenna(will still work on HF freqs right up to highband UHF)

Both are omnidirectional

of course having either in an attic will lower reception on both. Is
there a reason for not mounting it outside, even on the side of the
building or hidden inside bit of PVC tubing on the roof(in the case of
the scantenna)

AOR receiver/scanner AR-5000, AOR Spectrum Display Unit SDU-5500, Timewave DSP-59+ w/15W speaker, all inclusive package, also includes the AOR AS-5000 antenna switch, allowing front panel switching of up to four antennas, all operating manuals, plus the AR-5000 SERVICE MANUAL. The AR-5000 covers everything from 10KHz-2,600 MHz (less cellular), 1,000 memories (actually 2,000 if an extra 1,000 service memories are selected booting into service mode, described in the manual) and has more features than I can list. Includes a app so you can program everything from your PC.   Used 99.9% for FM voice in the 900MHz range, due to it's outstanding performance there, so if you have in depth questions, please consult the operators mauals, easily Goggled, or email me for links to manuals and photos.   Everything is in like new condition, includes all cables for the AR to SDU, audio to/from DSP, etc.. Factory p/s for the AR, wall wart for the DSP, but the SDU will need a 12VDC supply (it's shared with another now). Everything shipped to CONUS $1,695, USPS MO, or add $50 for PayPal. Bank or personal check, but with two week delay to ship. BUT WAIT, THERE'S MORE: if you're anywhere near NW Arkansas, and will come pick this stuff up, saving me the cost and trouble to pack it up, I'll throw in FREE the AOR DS-3000 discone antenna, along with the mast, tripod, and ~50' prime coax (not RG58, but satellite stuff, forgot the #), email for photo and antenna specs.   Email: parkerdr(at)cox.net

Hello,

Am trying to get some data bases in order, and would like to ask the following, please. Modes, knowing the correct ones, has always been a bit of a problem for me.

Am in my 70's now, and would appreciate any help, very much.
Still enjoy the hobby a lot, though.

My main question: are the FBI frequencies that are not encrypted like 163.900 and 170.300 all FM ?

and,

a. Mil Air: I've been assuming AM, but are any bands or frequencies USB ?

b.HFGCS Mode ?

c.Navy Giant Killer Mode ?

d. Air Refueling Mode ?

e.Norad Huntress Mode ?

f. FEMA Mode ?

g. LODAC (not even sure what it is; might it be LODOC ?) Mode ?

Much thanks,appreciate the help,
Bob

HF is USB
VHF/UHF air band mostly AM with some FM in the UHF
Normal land mobile VHF/UHF would be FM
MilSatComm low band UHF is mostly FM

this is pretty much the same internationally

Given that he's dead, prison would be as stupid as your claiming anyone thinks possession of a copy of the Constitution is illegal.

Pure horsehockey.
Post a link to the actual story.

The reporter hadn't done his homework. McVeigh was quickly arrested on numerous federal charges, none of which included the Constitution.

During the 40's there was an immigrations act that was passed into law in which the very part declared that possession of certain anti-government documents was illegal. Which led up to Mr. McCarthy and his witch hunt for finding out who was a communist. I believe, the Supremne Court ruled that was unconstitutional because it violated a couple of amendments and other federal laws.

Since the Constitution sets the framework for creating the government, how can it be anti-government? If it were, the entire judicial system would be illegal.

 It was down yesterday for me also. It could have been a DNS cache
issue. Try again to see if you can get through.

Where do you get the idea from based upon this article?
Nothing in the articke said anything about getting busted for driving a
look alike cop car, marked or not.
No judge in his right mind would make a person pay a fine for that
bullshit.

Hell, I had my 1963 Plymouth Belvidere decked out with rear deck lights,
overhead lights and antennas and people thought I was a city detective
because their cars were similar. Not once got pulled over by a cop for it.

A friend of mine bought a county cruiser at an auction. He never repainted
it. He had more antennas on his car than the county cop cars did. Nobody

ever pulled him for it.

Ignore the Troll.
The young dude was arrested because he had a weapon(s) in the very near
proximity of the President, not because of what his car looked like.

Radio Guy is way off base again.
I drove a 2006 Taurus for four years. It had three antennas on it.
One was a VHF antenna...it was for our Sheriff Dept.
The other was a UHF antenna...that was for our MDTs.
The third was for the silly CB bands.

And my Taurus had red/blue lights in the upper, darkened area of the
windshield. They were hidden by the tint.
It also had red/blue LED lights behind the grill. They were also hidden,
as was the siren.

I drove this Taurus for years, in many jurisdictions, and never once had
any officers do a traffic stop because this Taurus "looked" like a
police car...which it was.

And Radio Guy? Even when I was out of my jurisdiction...even in a
neighboring state, if I saw a brother officer in need of assistance I
would activate my emergency lights and assist the officer.
I never once had a brother officer refuse my assistance or tell me that
I was out of my jurisdiction.

We stick together. It is part of the brotherhood.

I got a GRE P/N: 30-0028 800 MHz rubber angle antenna included when I ordered my PSR 500 scanner on EBay. The extra antenna was a freebie thrown in with the sale. The problem is that it will only screw on halfway. The stock OEM antenna fits perfectly. But this folding antenna will only screw on halfway just a little shy of the point where the antenna base pins would normally drop into place. It doesn't matter if I push down on the antenna while screwing it on, it just won't fit.

Is this a common problem or just a one off exception? I was thinking of selling it, but I don't want to pass on my problem to someone else.

Can this be cleaned in some way?  The collar seems to be locked on the
antenna.

Did you try here ?

http://www.scannermaster.com/Carrying_Cases_s/41.htm

I did not see one specific to Pro-43, but another model might work.

OR try RS Legacy Parts for a new clip

```
200-0300       PRO43 PORTABLE SCANNER           Faxback Doc.#30401

To order parts call 1-800-843-7422 or visit your local RadioShack store.

             Cat.No.   Description                NP Part #

My scanner just went out on me it wont turn on or anything, and I think
it is the part I have in the pic. Can someone tell me where to get one
and the part number?

If someone has the schematic for this radio the white label number is (
L16) and it has a circle around the positive sign.

Thanks In advance for your reply!!

Post the article because your interpretations are useless.

At least name of paper and date of publication so we can read the facts not

in tennessee they give you plates which say "emergency" when you
appluu for ham plates.

But having legal license plates issued to him by his home state of
Ohio was part of the reason Joseph LaVey was arrested  by thee cops
in
north carolina since the cops said his legal plates issued to him by
the dmv are fake.

Maybe instead of getting and having ham plates, he should have had
these plates his home state of ohio issues to regular people (the
general public) to anyone who wants them just because they want them.

http://www.bmv.ohio.gov/sp_ohio_cops.stm

then just maybe he might not have been arrested.

If you believe those stories radioguy222 you must be a big suckka! Its
like national enquirer.  Look at the story about the deaf man
arrested for signing at police in sign language.  It says he is 31 yo.
He is 60ish thats for sure.  Cite any ordinances or laws for what
these sexual sign predators are violating?

later sukka!

Son, by no stretch of the imagination would anyone who has read your long, rambling whacked-out posts describe you as being "normal".

But, by all means do go - and the sooner the better. You are one of the biggest trolls here - you're a fine one to be accusing anyone else of trolling.

Can't blame you for trying to hide from history the tripe you spew.

Still waiting for you to post sources from the supposed news articles you rant about. You always seem to fail when you are asked to back up your blather with fact.

You are seeing that, too?

This guy is posting crap simply to stir things.
I doubt that he is a licensed Amateur Radio operator and I can attest for
sure that he has no law enforcement training.

My question is about the Uniden BCD996T scanner. I have a "conventional system" called Air Traffic which includes four groups for various airports in my area. Each group contains several frequencies for that airport. Sometimes, I want to listen to just one airport, not all of them and I use the group quick key to disable the airports I don't want to listen to. However, I recently disabled all of the groups within the system and now apparently there is no way to turn them back on. I keep getting "nothing to scan" message. I can turn the "system" on and off with it's quick key, but I can not turn on any of the groups within the system. I use FreeSCAN software to program the scanner and save backups of my programming. If I delete the system from the scanner and re-upload it from a file using FreeSCAN, it works again, but surely there is a better way. If not, this is a serious bug, because if you ever turn off all the groups within a system, there is apparently no way to turn them back on again. Any help would be appreciated.

Thanks,

--Jim

I tried that but it did not seem to solve the problem. Your instructions were very specific and unambiguous so I am sure I did it exactly the way you said. Is there any additional step or something I missed because it isn't working for me. I am using the latest firmware version 3.02.00

Thanks,

Ham installations have federal pre - emption over any regulations that hoa's, town or city governments, states, or anyone else can pass. the simple solution for these people is to get a ham license, even a technician license, which any 10 year old kid could get if he studied for a week, and join the ARRL. Put up your ham antenna, or scanner antenna, whatever you want to, and when they start giving you crap about it, call the arrl, and tell them all about it.

then, sit back and see how they like getting fined 500 dollars a day for interfering with a government emergency installation ! the FCC will come down on them like a ton of bricks.... It really doesnt matter what the antenna you put up is FOR, since if you SAY it's a ham antenna, it falls under these protections. Endlessly bitching about it on these news groups is not going to solve your problems. Remember this: ANY effort on their part to prevent you from operating, putting up an antenna, ect, is going to be a regrettable experience for them... One they will remember for the rest of their miserable, controlling lives...

...

I believe that the amateur radio antenna preemption applies to regulations by government entities only (zoning laws, etc.) and not to regulations by private entities (HOAs). This is in contrast to the television antenna preemption which applies to both of the above categories.

Now, I just got done, in another posting, explaining this: If you don't have a ham license, then GET ONE. HOA's, State, County, municipal governments have no "right" to pass ANY regulations regarding Ham Radio installations. Ham radio installations are GOVERNMENT EMERGENCY INSTALLATIONS, and as such, they have FEDERAL PRE- EMPTION over any regulations passed by ANY State, local, town, city, or HOA. Get a ham license, join the arrl, and when they start messing with you about it, call the arrl, and tell them what is going on. Because they are willfully interfering with a government radio installation. Let's see how THEY like getting fined 500 dollars a DAY for such interference....

Your a Dufus, and do not know the Law, as it applies to PRB-1.... HOA
Restrictions ARE Deed Restrictions, (read Private Contracts) not

Uninformed jibberish snipped

They are talking about cloning radios on trunked networks
The problem a cloned radio causes is that if it is using the same ID as
another radio it will log onto the system, the system can not allow two
radios with the same ID in so the problem is that when a Police radio is
turned on but it's ID is already logged on the radio will not be allowed

access to the trunked network

The cloned radio that is logged in means it also is able to transmit on the network, the only way to remove the offending radio is to block that ID, but this means that they need to reprogram their radio with that ID to give it a new ID

Trunking scanners do not need to log into the system to follow signals across the network so do not cause any problems

Please do some research before posting silly comments

And the reason Police are pulling you over all the time has nothing to do with there being an antenna mounted on your vehicle

There is a police band between 420 MHz and 430 MHz?

This person is the biggest fucking idiot I have ever observed. The worst of it is that he is doing it on purpose to get a response. He's probably laughing at you other people.

Those devices are *receivers* and do not transmit, correct?

So how does problems with unauthorized *transmitters* justify
outlawing *receivers*? And isn't it already illegal for civilians
to transmit on frequencies assigned to police, per FCC regulations?

What use is assigned to the frequency band in question, anyway?

>Listening to the information on a certified police scanner is

There's a difference between transmitters and receivers. Duh!
Are there any consumer devices which are receivers only but it's easy
to modify them into transmitters as well? I doubt it.

>�I think [5194] is a good bill regarding cloning,� Lieutenant Bonnie

If you want to outlaw transmitters on a particular band, that's got
nothing to do with receivers.

The bill does not outlaw receivers or scanners used by individuals. Don't depend on the accuracy of anything "radioguy" posts in these newsgroups, as he consistently distorts and misinterprets existing and proposed radio-related regulations and legislation to make himself look like a "victim".

Better to go straight to the source, such as:

http://scannerfood.com/news/HB5194.htm

There IS a provision in the law seeking to prohibit re-broadcasting police communications on the internet via streaming audio - but that is under debate in the legislature.

Read my post as to what they are trying to stop
it has to do with cloning trunking radios which transmit to access the=20
system so that it can follow the system as it switches freqs and lockout =

Under what provision? The only exceptions to the use, U.S. Government radiolocation (primary) and Amateur use (secondary), inside the United States are:

1) Certain land mobile uses in Detroit, MI, Cleveland, OH, and Buffalo, NY, and

2) North of "Line A" (defined at 47 CFR 97.3(a)(26) - roughly paralleling the U.S/Canadian border 50 miles distant).

Amateur operation in 420-430MHz south of "Line A" may continue as long as it doesn't cause harmful interference to the above mobile users. I don't see Illinois as among those users.

From:
http://ecfr.gpoaccess.gov/cgi/t/text/text-idx?type=simple;c=ecfr;cc=ecfr;sid=1e65c7a198eb7d479ac3083fc924244e;idno=47;region=DIV1;q1=90.273;rgn=div6;view=text;node=47%3A5.0.1.1.3.10
(As of today's date)

"[47 CFR] � 90.273   Availability and use of frequencies in the 421-430 MHz band.
"The frequency bands 422.1875-425.4875 MHz and 427.1875-429.9875 MHz are available for use in the Detroit, Michigan and Cleveland, Ohio areas. The bands 423.8125-425.4875 MHz and 428.8125-429.9875 MHz are available for use in the Buffalo, New York area. Sections 90.273 through 90.281 address the specific rules applicable to these bands. Use of these bands is also subject to the general technical standards and application procedures contained in other subparts of part 90. The technical standards applicable in this band are the same as those contained in subpart I of part 90 for the 450-470 MHz band. Private land mobile use of these frequencies is subject to accepting any interference from Federal Government radiolocation operations.

"(c) [For purposes of computing the distance radii:]
Buffalo, NY 42�52'52.2" North latitude.78�52'20.1" West longitude.
Cleveland, OH 41�29'51.2" North latitude.81�41'49.5" West longitude.
Detroit, MI 42�19'48.1" North latitude.83�02'56.7" West longitude."

I see nothing that permits land mobile [radio] use by the State of Illinois or any political subdivision thereof in the 420-430MHz range.

6/4/10 - MEL07 Shutdown

The troubled MEL07 repeater located at the Pentland Hills in Melbourne's west has been shut down possibly never to return and the committee that oversees MEL07 and other repeaters across Melbourne have not ruled out turning off more services under their control if trouble continues.

A committee spokesperson told UHF CB Australia that 'It was a very tough decision to make, but one that could not be postponed any longer" She went on to say that "It is sad that a handful of CB'ers are ruining a hobby that so many find so enjoyable"

Melbourne over the last few years has seen the return of a record number of repeaters to the metropolitan area but unless things improve we may see a return of empty airwaves, Something that looked like it was going to be a thing of that past.

That is what I was wondering, I'm sure that band's primary user is the
U.S. military and Amateur radio users are secondary users. I'm sure
it is against several laws for any police agency to interfere with our
military. The Air Force has been active in protecting their part of
the 70 cm band in two places in the US.

the tv news said that if a cop or resident calls an emergency number on their home phone or cell phone and can't get through because there is rfi by someone transmitting on a radio or someone else talking on the same frequency the person or cop's phone is using. they can be arrested under this law for interfering with emergency communicatiomns.

Now that sure sounds like they're talking about rfi.

If it's only means people using explosive device to blow up a cop's cell phone or resident's cell phone, how is that person going to be able to dial it when it's in pieces and why would they be expecting an answer in such a case?

It definitely means rfi.

So in Ohio, a ham can no longer legally use the 900 mhz ham, 2.4 ghz or 5.8 ghz bands even though federal law says you can, because someone miight try to dial emergency services and only hear the 900 mhz ham repeaters when they call or the ham on the input frequncy or simplex.

Furthermore, the news said any rfi.

Again the news specificically mentioned "radio frequency interference".

Which means even if the ham is operatung 2 meters, 70 centimeters or hf bands and the residents' phone or cop's phone is overloaded from no sheilding, the ham is the guilty party guilty of committing an illegal act while the part 15 drvices without any shielding are ptotected by laweven though federal law says the exact opposire of the state law.

And no, they did not say cb and ham are protected. They're only protected if a cop or resident is using the cb or ham radio to make an emergency call and someone inteferes with it.

It sounds to me like you live in a gated community - like a prison. When does your sentence end, anyway?

If you're not in prison, you might as well be.

I'm the third generation of my family to own this house, and I love it. I grew up here, and I have a lifetime of fond memories. It is mortgage-free. But if I lived in the type of area you describe I'd move in a heartbeat, even if I had to leave everything but the clothes on my back behind. I might even do it if I had to go naked.

This isn't about OTA TV reception. In the overall scheme of things, that's unimportant. It's about all that other crap.

Get out as soon as the warden lets you go.

Yes, the FCC fact sheet for the OTARD rule states that "The rule does not
apply to television antennas used to receive a distant signal."

They should complain to the local franching and consumer agencies as well as
the FCC, unless the issue is with local wiring in the home/residence.

The stations presumably weren't distant when they were analog The rules
exclude larger antennas for receiving distant signals, That term, distant
signal, is apparently the FCC regulatory term of art here and was developed to

describe a signal normally imported by cable systems via means other than over the air reception.

http://www.museum.tv/eotvsection.php?entrycode=distantsigna

http://www.nielsenmedia.com/glossary/terms/D/index.htm

It seems to me if the local cable system can get the signal with a standard over the air antenna mounted on a high enough mast, that would not be a distant signal.

If your homeowner's association won't budge, then it may be necessary to petition the FCC to make a determination and enforce their rules if they determine those stations are not distant signals. But that won't help you with the next question about a shared community antenna, only with an individual antenna on a mast located in an area you control.

A shared community antenna is likely out of the question unless the homeowner's association agrees because the wiring and other parts of it would likley be installed in areas they control and individual residents don't.

Are you REALLY such and Idiot, that you think your interpretation of the Statute is the way it is... what a Morooon... Bugs Bunny Definition...

the simple FACT is that any unlicensed Part 15 Transmitters and Receivers MUST NOT interfere, and MUST accept Interference for any Licensed Transmitters in the same Band, PERIOD. That is Federal Statue as part of Title 47... This supersedes ANY State or Local Restriction or Statute, that some Yahoo local Politico thinks would be nice to pass. All one would have to do when the case came before a Judge, IF it EVER Went That Far, would be to trout out the Title 47 Statute and the Judge would dismiss the Case Post Haste....

Geeze Louise, you are an Idiot... what part of the Federal Statutes do
you NOT understand????

rec.radio.scanner:1413 alt.radio.scanner:767 misc.legal:99712

I just read in another newsgroup a post by a persn who lives in a hoa
He can not put up an antenna for broadcast reception even though
federal law says hoas can not prevent people from putting up antennas.

the way the hoa got around the dederal law is by outlawing him and
everyone from putting up any antenna masts at all..

Since they outlawed the antenna masts and not the antennas, as far as
the hoa is concerned, they'tre not breaking any of the federal laws
about them not being allowed to ban people from putting up tv
antennas.

put up a fucking big fence and get an even bigger dog

no, I do not live in a gated community. I don't even live in a hoa
although there are a couple around here and we do have a nosy nimby
neighbor who also dows not live in a hoa, but now the municipality is
trying to get us to put CC&Rs which run with the land forever onto our
non-hoa non-CC&r property whicv we moved into decades before any hoas
complexes were built around here.

and decades beefore any places having CC&rs were built around here.

Bullshit. IF, as you say, you are constantly being stopped, questioned or otherwise harrased by the police, it is undoubtedly because either by reputation or behavior, you have given them reason to believe that you are a whackjob who is potentially a danger to yourself, or your community.

In 35 years of amateur radio mobile and portable operations, in almost all 50 states; in dozens and dozens of towns, cities and villages, I have NEVER been stopped, questioned, detained or otherwise bothered by any law enforcement agency - even when driving vehicles literally festooned with antennas. With one exception, no cop has ever given me a second look, even when I have operated portable H/Ts in public locations and events right in front of them.

The one and only time a cop ever showed the slightest interest in one of my radios, it turned out that he was a fellow ham. He was thinking of buying the same model H/T I was using, and wanted to know how much I had paid for mine.

With your rambling, incoherent posts, you're only convincing people that you are not playing with a full deck. Nobody believes a thing you say - why do you bother?

You don't have a clue - not one, single clue. NO municipality anywhere can "force" a covenant onto a property that does not already have one.

A restrictive covenant is an addendum TO A DEED, and a deed can ONLY be changed if, and when, a property is sold or transferred to a new owner.

Barring a sale or transfer, no change or addition to an existing deed can be imposed by any municipality or court, period.

The only thing a court MIGHT do, is to rule that an existing covenant is invalid or unenforceable, which is the case regarding deed covenants which were once very common 50+ years ago - covenants which prohibited a property owner from selling their home to anyone not of the caucasian race. Though such racially-based restrictive covenants may still exist in the deeds of very old homes, they are null and void under current law.

why aren't the police out catching some real criminals? Trust me, the
police have no vlue to radio,tv, or electronics. I and several other
people have consistently been pulled over and/or stopped and/or
arrested by police stating phony radio laws they had/have no idea
about.

Such as all CB radios are illegal for American citizens to possess
unless they have an amateur radio licencse which specifiically permits
amateur radio operations on the standard 40 CB channels.

By stating that I must follow that law and ordering me to do so, and
telling me I would be arrested and piut in jail if I didn't, the
police officer ordered me to commit a federal crime.

They also told me it was against the law for me to have an Ic-R3
radio. Because they are police radios the police talk to each other
on.

By doing so, the police officer just admitted that he and the whole
police department are guilty of breaking federal law.

I was told it was against the law to have a shortwave broadcast band
converter/reciever in my car.

It only picked up the shortwave broadcast bands, nothing else, and not even all of them. It could only pick up the stations like BBC, Radio France, Radio Nederlands, etcetera, not even ham radio.

I and other people have heard the police and fire departments using frs and gmrs for their dispatch and other operations.

And if a citizen l(who is unaware the police uses it) listens for a minute on the channel, hears no one and transmits they are arrested and jailed for "transmitting on a police channel" even though it is no such thing.

And if they try to get out of it, the police will say it is a private police channel the citizen was illegally transmitting on because the police bought it and it even said right on the package "private line" which proves that it is a private channel and sincxe it is a private channel, no one else should be on it.

So as you can see, the police have no idea what the radio laws, rules, and regulations are even though they try to enforce them by trying to enforce non-existent laws, rules, and regulations.

Amd the written fcc rules don't helpm uch either since even English grammar teachers agree the way the fcc rules are written say that all CB radios are illegal for American citizens to possess.

What the FCC needs to do is reword the passage stating police have authority over illegal cb radios in a way where the polive won't think all cb radios are illegal and where the police understand that they do NOT have authority over legal cb radios.

Then again, even if teh FCC does that, it still won't help much since as you can see from all of the above, the police are intent on enforcing non-existent laws, rules, and regulations which don't, didn't, and never did exist anywhere at all in the first place.

And no, I was not speeding when any of it happened. One time I was driving. (the shortwave radio), the other time I was on foot (the scanner) and the other time I was parked in the legal parking spot in a park during legal operational hourss during the day for less than two minutes.

I did not even have time to get out of my car berfore teh officer came zooming up to arrest me simply because he saw ONE antenna on my car which was a legal CB magmount antenna.

Well the reason you want to prevent any of these local or State RFI laws to be passed is because to not be cited by the law you must either go to court to have the court rule the law null and void or wait until cited and hire an attorney to defend you. If the local judge doesn't see it your way then you have to appeal to a higher court and the lawyer fees for those kind of appeals start at about $25,000.

A lot of people think you can just waltz into court and get a law voided, but in reality it will take more action because all the State has to do is argue that their law is legal and get the local elected judge, who received donations from the local HOA's for reelection, to agree.

wrong again. The police there have interpreted the law in exactly the way I said they would interpret it, which is what I was warning against, and 100 percent of the people posting here said the police there would not interpret it in that way.

The intention of the law is exactly what I said it was. Because what all the other posters here said the intention was did not make any sense whatsoever given the text of the law.

The police interpreted the law exactly as the law's intentions were meant to be interpreted.

It might be an illegal law, but what I warned against has happened using that law.

here's the proof:'

I drive a F-150 and have several radios

In my 1988 F-150, I had 4 antennas mounted permanently (through hole in
roof) in a line don the center of the cab. I would hit the beams in
garages and it was difficult to park some places

Now, I have 3 magnetic antennas, I can take the antennas down if I go
through a car wash

If you have a truck and radio equipment, how do you mount you antennas ??

Am considering adding a roll bar to the front part of the bed right
behind the cab. I will have the roll bar be slightly below the roof line
    and able to pivot should I need  to go in a parking structure or car
wash

I have one 2 M/440 antenna.  It can be bent over when required.  It is
on a bike rack clamped to luggage racks.

"it has happened using THAT LAW"

Wrong. The example you cited avove happened OVER 14 YEARS AGO. The law in question) was just recently passed. The example you gave has absolutely nothing whatsoever to do with the current law.

I'm not saying that someday, somewhere, an incompetent, power-hungry, overzealous cop or prosecutor might not attempt to misuse/misapply the latest law in Ohio or Illinois to go after someone who is innocent of any wrongdoing. Such judicial misconduct has happened before, and will no doubt happen again. But as always, you have distorted and overblown the situation.

By trying to connect an incident from 1996 to present day legislation, you only (one again) make yourself look like a complete fool. You destroy your own credibility every time you do this, which calls into question the validity of ALL your opinions.

You damage your own case by your own words, time and time again.

restrict vegetable gardening, restrict the color you can paint your

This is a group for gripers, so I typed "gripe" on purpose.
Although it seems like there are a lot of self-grippers on here!

it might be appropriate to decrease the extension of the microphone by the use of
adequate competencies.
as a consequence it should be helpful to detail the supervision of the
microphone .
now after discussing about sound as well as the design of microphone , it might be
appropriate to detail the bandwidth management of the microphone efficiently.
now it might be better to develop the authorization of the microphone accurately

Why would you want to? It's only a estimated reading of the actual
signal anyway. You'd be better off buying a newer scanner with that
feature.

I got some declassified CIA documents regarding the A-12 crash near
Wendover Utah. In the 400+ pages, there is a chronological log of the
events of the flight. This particular page notes the radio stations
and beacons used with the planes ADF. Of interest is a beacon on
377KHz, noted as both XTS and STB.

www.lazygranch.com/images/cia/wendover/xts_stb_earth_377.jp2
You will need irfanview with the plugings to view this document.
http://www.irfanview.com/

Any ideas on where this NDB is located? Note that many of the beacons
on the list are now history. [Austin was converted to DGPS] so this is
probably an historic beacon as opposed to operational.

For some unknown reason, google puts their url in front of my url. If you look at the link, this becomes obvious. I'll try it again with a http in front:

OK, this time it works. I guess "the google" wants to see the link and
sniff it for malware.

Maybe, this guy considers the new RFID sensors which do speech recognition
and may be jammed during the authentication process.

I would like to try something new, and want to swap my Eton E1XM for
any of the following table-top receivers (used of course):
Icom r75;
Drake r8;
Yaesu FRG-100

If you have something that is not listed here but you think it is fair
trade, please send me your review of your rig. Try to convince me.
My Eton E1XM is in superb condition, purchased in US two years ago,
has all included in the box accessories and even the wrapping plastic
(the box is also here). No scratches or wear-outs or anything, the
condition is like new.

I call bullshit.  Ohio Revised Code Section 2953.08 guarantees the right of
appeal.

I think I'll send this one into snopes.com for verification.
However, I wouldn't be to surprised if Ohio had passed such a law.
There was another jerk a couple of years ago that was mouthing off about
some law in title 49, which covers the trucking industry. Only problem is,
the number used was one of those that had been repealed.

First of all, Every manufactured electronic device has a little sticker on
it that says "This device must accept any and all interference".

Furthermore, it is highly unlike that any ham radio unit would cause such
interference to a 900mhz cordless phone. As the frequency increases, it
becomes more difficult to send a signal with the same power. Not to mention
that most manufacturers include various filters to keep those signals out
of the equation.

As for CBers interfering with cordless phones, if one ever does, I'll be sure not to buy that brand of phone.

Do you have a wireless keyboard? Like one from logitech? Look at that little sticker on the back. 27mhz. Guess what? Hello. That's in the CB band. They use a channel that is set aside for "Remote Control" (RC). So your neighbor's kid little RC car could be on the same frequency and you wonder why the keyboard is screwed up. So this alleged law could also effect any RC device as well as common computer devices.

Can we just end this with HORSEHOCKEY!

What is amazing though is, this is an actual law!
http://codes.ohio.gov/orc/2909.04

However, this does not mean that a ham radio operator could be charged for doing so while transmitting a signal. It does mean that a person who deliberately causes disruption to public services, with something like an explosive device, most certainly will be.

As usual, you have twisted and mis-stated the facts, and blown everything completely out of proportion in order to make this Ohio law "fit" your persecution complex.

It is clearly stated right in the first paragraph (A) of the law that it only applies to individuals who DELIBERATELY and KNOWINGLY, (i.e. with criminal intent), interfere with emergency communications systems, broadcast stations or the like - either by on-air "jammimng", or by causing physical damage or vandalism to emergency or public communications infrastructure.

The law is in the category of crimes concerning ARSON.
The wording was twisted to make it appear that transmission of radio
signals causing harm is a criminal offense. That is NOT what the law says
at all.

29009.4(A) merely defines what is meant by "emergency public service".
Which includes ham radio and even CB radio. Both of which can be used in
emergency situations.

So, given your public service intent, here, and, myself, questioning the efficacy of changing a public ordinance by wailing in a USENet newsgroup, I have to ask: have you taken more definitive steps to get this addressed? Like notifying the ARRL. They most certainly would have something to say about it. Or FCC? FCC has dominion over communications issues, and has ruled specifically on the issues of interference, antenna installation, and the HOA CC&R's limiting of TV, and satellite antennae installation.

Have you taken your complaints there?

Or are you just flailing against 'the man.'

Make no mistake, I'm fully aware of the war on radio hobbycraft in this country.

But screaming 'fire' in a crowded NRA convention may not be the better way to accomplish your goal.

Agreed - and moreover - does it make sense to air these views on a FRS
newsgroup? The connection is tentative at best.

This radioguy is a DUFUS, and has a long history of reading a ton of BS
into local Statutes that have to do with Radio Communications.... I, and
MANY others, have refuted his BS, but he continues to froth off at the
mouth, about things he really just doesn't understand.... Being a former
FCC Field Agent, I still have a lot of insight, and even a few friends
at the Commission, and 99% of his conclusions are bogus from the get go.
Just put him in your PLONK File, and ignore him.....

As a former Field Agent, can you help us understand how one might have

Sure, In the Commissions Rules and Regulations (Title 47) there are Rules that state that to be Eligible to Hold a Radio License in the USA, one must be of "Good Character". The definition includes such things as not being convicted of a Felony Crime while using Radio Communications, Not being convicted of a Felony Crime of Violence, Not being convicted of Wire Fraud, or a number of other lesser Crimes. If you have ever had a License Revoked, for ANY Reason. Violation of the Secrecy Clause of the Communications Act of 1934, as Amended. (although I have never heard of a prosecution for this). If you have been issued a Violation Notice and not Responded, and it went to a Hearing, and Revocation was part of the Judgement. I heard of a fellow that owned a small local Radio Station, that was issued a Violation Notice for Tower Lights not operating properly, He choose to not respond to the notice, and when the Field Agent "Pink Slipped" the Transmitter, and took it off the air, he removed the seal on the Power Switch, and went back on the air after the Agent left the site. The Agent came back the next day with a Federal Marshal, and they put the guy in the Slam, and revoked the Station License for that station and start proceedings to revoke his Class A Citizens Band License, Ham License, and Land Mobile Licenses, under these rules, as not being of "Good Character"... The Administrative Law Judge wasn't impressed with his Court appearance, and granted the Commissions Revocation requests on all counts. He did time for the Tower thing, and lost everything....

Just a note here: FCC Field Agents do NOT have Police Powers, on Land or Sea... but they can, and do, have the ability to get a Federal Marshal for Land, and a USCG Officer for Sea, to enforce the FCC Rules and Statutes if that is the only recourse. When doing Vessel Inspections for SOLAS Compliance, I have had to get a USCG Officer to make a Violation Notice stick, on a couple of occasions, and had to get a Federal Marshal a couple of times, for Interference with Safety Communications Issues by stations on Land. One of those was for a Cable outfit with a VERY Leaky System, that was taking out the local Cops Repeater, the USCG local Marine CH16 Vhf Receiver, AND the local Airports Approach Frequency, all at the same time. That was a GIANT MESS....

Me   Memories from time gone by....

You would be surprised, I found a new one last year at a small store in a small old town they had on the shelf for years but it was still new. A good used one would be fine if I can locate one. There was just something about these scanners that I liked. Thanks for your reply.

I bought the radio from Radio Shack a few years ago.

I just found out that less than a year ago, in 2009, according to the FCC, the motorola t6250 (radio (and other similar raduios) is and always has been an illegal radio completely illegal to use at all because it can do speech inversion,(which is coded messages according to the FCC), even though it has been type accepted by the FCC and approved by the FCC as completely legal to use in the U.S.

The FCC even said such radios are and always have been illegal even though the FCC type accepted it as legal and approved it as legal.

and that it's iullegal to use at all even in non-scramnled mode without speech inversion enabled since it is an illegal radio.

So since the radio is and always has been completely illegal to use even in non-scrambled mode since it is capable of scrambling,

the radio is NOT fit for the purpose which it was sold for and sold as
.
But Radio Shack won't give me a refdund for the illegal radios they sold.

I had no idea at the time I bought the radio that it was illegal since it was FCC-type accepted as legal.

But all the lawyers and judges say "ignorance of the law is no excuse".

How do I get my money back for Radio Shack illegally and fraudently selling me illegal radios under the false, phony, and fraudelent pretense that they were completely legal since they were fcc type accepted and fcc-approved as legal?

Apparently, this is an oversight of the FCC. Some times things just get done automatically. When you have a major corp. producing millions of radios annually, introducing new types constantly, paperwork becomes rather routine.

Midland radio is in the midst of the same legal action against them for doing the same thing. The FCC contends these radios are illegal because the "message is coded". However, as the FCC also does not precisely define exactly what is meant by "coded".

As I see it, the rules are basically saying, sideband operation is not allowed. Which I believe this is how the message is being coded.

What to do with your radio? I'd say use the damn thing as is. As far as you are concerned the radio is legal to operate as is. It is up to the FCC to ensure manufacturers comply with the rules. Not yours, not the vendors.

One option might be to sell it on ebay.

What if you're charged with the henious crime of transmitting a coded message? Hire a good attorney and fight the bastards. You purchased, in good faith, what you believed was a perfectly legal radio and one that was approved by the FCC themselves. Then, don't do business with Radio Shack.

I learned a long time ago, Radio Shack is a rip off on electronics. If you pay $10, the store manager paid $2 for it.

But the radio itself may not be illegal to sell or own. Using it may be illegal.

What does the law say about selling and owning it?

Odds are the PTB at Radio Shack didn't either, though I know no way to check this.

You can file suit, if you want. Realistically, I don't see you winning.

You would need to prove Radio Shack sold it to you knowing it was illegal. By your own claim, the FCC listed it as legal, so it's very likely the people at Radio Shack who make decisions regarding what to sell and what not to sell also thought it was legal.

You will need to be able to prove they knew the reason you were buying it. Common sense indicates you bought it for use, but common sense and the law aren't always in agreement.

Richard offered a POSSIBLE idea. If it is legal to buy and sell, tyr selling it on ebay. It's unlikely you'll get what you paid for it, but you can get some money.

FYI, the FCC rules state mostly that is illegal to import, manufacture, sell, possess and use such illegal equipment.

The most common of these violations occur when a radio is produced to be used on the 10 or 12 meter ham radio band. With the capability of being used on the 11 meter band which is known "Citizens Band" (CB).

The FCC routinely tests these radios and if the find any way that it can transmit on 11 meters, it is classified as illegal. Manufacturers do so to avoid the "type accpetance" requirement and to sell their radios to

enthusiasts known as "truckers". Buying one can cost you $10,000 and the
loss of your radio.

For the law itself, read up on "illegal CB radios".

Pack your radio up. Send it to http://sales.kb9rqz.com and trade it
in on a "10 meter" radio. Maybe something with a turbo echo.

And do be sure that the radio can be converted to 11 meters.
Dumbass, ham radios don't come with echo crap. As that is illegal as hell.
That shit is all attached purely for the truckers.

Read the frickin rules a-hole. Guess which radios are on the banned list?
The very ones you mention. Do ham radios come equipped with channel
selectors who's range is between 1 and 40? 10 meter voice begins at 28.3,
well above the 11 meter band.

Dual operation of this type is just not permitted, period.

All Galaxy DX radios are banned.

Echo serves no purpose other than to show off.

http://sales.kb9rqz.com is the source for all of your amateur radio
needs!

I got my new radio from Mark and it rocks! Nothing like calling CQ DX
on 10 meters with your turbo echo adjusted just right.

I had some asshole crying about my radio sounded like a CB. I just
told him to fuck off and turned on my slap-back audio (also from
kb9rqz) and repeated my callsign over and over again. He got pissed!!

REMEMBER.........we are the new breed of hams!!

Hey Richard...............
You're one of those dick type hammies, I can tell.
But listen up you shit stain. And listen good.
My elmer is KB9RQZ. I even got my tech manuel at  http://sales.kb9rqz.com

I had to study for three fucking days to pass my test.

I AM THE FUTURE OF HAM RADIO !!!

I didn't need any stinking morse code, either !

Where in the rules does it say I can't run my turbo echo on 10 meters?
You can't quote it 'cause it ain't there.

Now be a good hammy and go fuck yourself, little Ricky.

Hey Richard...............
You're one of those dick type hammies, I can tell.
But listen up you shit stain. And listen good.
My elmer is KB9RQZ. I even got my tech manuel at http://sales.kb9rqz.com

I had to study for three fucking days to pass my test.

I AM THE FUTURE OF HAM RADIO !!!

I didn't need any stinking morse code, either !

Where in the rules does it say I can't run my turbo echo on 10 meters?
You can't quote it 'cause it ain't there.

Now be a good hammy and go fuck yourself, little Ricky.

Kb9rqz was also my elmer until someone emailed me this description of him.

http://ve7kfm.com/kb9rqz.html

 I didn't realizewhat a lid he actually is. The CCRAA also fired him as
their president after they found
 out what a sexual deviant/pervert he is. You may want to find a new
elmer....
